PURDUE UNIVERSITY
DAVIDSON SCHOOL OF CHEMICAL ENGINEERING
CHE 40000: PROFESSIONAL DEVELOPMENT SEMINAR SERIES
DISTANCE LEARNING

SYLLABUS

In this class, everyone is expected to uphold *Purdue's Honor Pledge*:
"***As a boilermaker pursuing academic excellence, I pledge to be honest and true in all that I do. Accountable together - we are Purdue.***"

1. OBJECTIVE

The goal of this course is to help prepare chemical engineering students for the transition from being an undergraduate student to becoming a successful professional or graduate student.

Upon course completion, students will be able to:

- Demonstrate an understanding of the need for developing leadership skills, professional integrity and ethical decision making in the professional practice of chemical engineering (→42000, 45000)
- Demonstrate an understanding of contemporary issues encountered in the professional practice of chemical engineering including business practices, environmental, health, and safety issues and other public interests (→42000, 45000)
- Identify the wide-reaching effects that engineering decisions have on society, our global community and our natural environment (→42000, 45000)
- Demonstrate an appreciation for engaging in life-long learning and using appropriate learning strategies to maintain and enhance the professional practice of chemical engineering

ChE 40000 addresses the following Chemical Engineering Program outcomes:

4) Recognize ethical and professional responsibilities in chemical engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
7) Acquire and apply new knowledge as needed, using appropriate learning strategies.

2. Instructors

Dr. Gabriela Nagy, FRNY G051, email: nagyg@purdue.edu
Karissa Raderstorf, FRNY G041D, email: kraderstorf@purdue.edu
Office hours: Please request an appointment via email at nagyg@purdue.edu.

3. Specific Course Information. Procedures and Policies

ChE 40000 is a one credit hour, required course for chemical engineering students. The course is offered during both the fall and the spring semesters. Please note there is no textbook for this course.

3.1. Recommended Course Resources/Memberships:

An AIChE membership is highly recommended and encouraged, not only for this course, but also as you begin your career as a young professional in the field of Chemical Engineering. Membership is FREE for students and upon graduation, the Davidson School of Chemical Engineering will extend your free membership for two additional years. If you are not an AIChE member yet, we strongly encourage you to become a member TODAY. Visit https://www.aiche.org/ to join, or renew your membership. Our school has a very prestigious AIChE Student Chapter led by President, Rebecca Bedwell (rbedwel@purdue.edu). Should you have any questions about membership or activities, please reach out to Rebecca and the Purdue AIChE Student Chapter Leadership Team.

The AIChE Academy provides online courses, webinars, videos, and much more to help young professionals advance their career and develop professionally. Many of these resources are totally **FREE**

for members and can be taken for credit that counts for professional development in your future career. Learn more about AIChE Academy here: https://www.aiche.org/academy. Although you are not required to, we encourage you to use the resources available on AIChE Academy throughout this course.

During the course of the semester, students will complete professional development activities in line with their own personal and career interests, in 4 (four) categories, and submit them for credit along with proof of completion. In addition to completing activities, students must also complete 2 (two) required quizzes. **Completed activities account for 80% of the final grade, while quizzes account for 20% of the final grade**.

3.2. Activities completed for credit

Although students can (and are encouraged) to complete as many activities as they wish within one category, **only 25 points in each category will apply towards the maximum total of 100 points that can be earned under "Activities" as part of the final grade**.

Categories for Professional Development (must complete at least one activity in each category):

A. **Career Readiness and Life-Long Learning**
B. **Contemporary Issues in Chemical Engineering**
C. **Engineering Ethics**
D. **Engineering in a Global Environment**

Activities from the list provided can be completed in-person, online or as individual study at any time during the semester. If students wish to complete an activity not listed on the recommended list, they need to contact the instructor for approval prior to completing the activity, to ensure they receive credit.

Students should submit a fully completed "**CHE 400 Activity Form**," to provide details about the activity completed and what they learned from the activity (a brief paragraph of 50-75 words). Supporting documentation, as applicable (e.g.: Certificate of Completion, AIChE Certificate of Professional Development Hours, SAChE Certificate, PDF of responses submitted for final CILMAR assignment, photo/selfie taken at in-person events, etc.), must be submitted at the same time as the completed activity form. The instructor will evaluate the activity and credit points towards the maximum 25 points achievable in a respective category. All students are encouraged to explore the wide variety of suggested activities, and other activities of interest and to avoid procrastination. The use of ChatGPT and other AI agents for generating any part of any assignment or to answer quizzes is expressly forbidden.

Completed activity forms: can be submitted throughout the semester; however, **there are 2 (two) deadlines for submission:**

- **Deadline 1: 11:59 pm on Friday, March 13, 2026**
  Students must complete a minimum of 10 points worth of activities **in each category** and submit completed activity forms and supporting documentation (as applicable) **by March 13** to avoid the late submission penalty after this date. Any activity forms submitted after this date will be penalized 50% until the 10 points requirement is met in the respective category.
- **Deadline 2: 11:59 pm on Friday, May 1, 2026.**
  Students continue to complete activities in each category and submit completed activity forms along with supporting documents (as applicable) to earn credit towards the max. 25 points in each category. Students are encouraged to avoid procrastination. Please also review the "Late Submission" policy under "Grading".

If you believe you have a problem in meeting these deadlines **for a valid reason,** please contact Dr. Gabriela Nagy at nagyg@purdue.edu to discuss your personal circumstances.

A. Career readiness and life-long learning (max 25 points in this category)

The activities in this section/category are meant to help students prepare for the transition between life as a student and that as a young professional/graduate student.

Although you can complete activities in any combination to earn points towards the maximum 25 points applicable for this section, to make the most of this section, it is recommended that you complete a variety of activities.

Please note: Students must earn a minimum of 10 points in this category by 11:59 pm on **March 13** to avoid the late submission penalty for this deadline. Assignments submitted after March 13 will be penalized 50% until the 10 points requirement is met in this category.

1. Visit https://www.aiche.org/academy and browse available resources. Complete any relevant activity and submit a completed activity form, along with the PDF of the *AICHE Certificate of Professional Development Hours* (PDHs), received upon completion **(10 p).**
   Please note: (1) This activity can be completed for credit multiple times, no limit.
   (2) Recorded videos/webinars that do not provide a *Certificate of Professional Development Hours* (PDHs will not be accepted for credit.
   Some suggested topics:
   - Career Strategies for Young Professionals
   - Job Derailment vs Success: Advice for New Engineers
   - Marketing your Value
   - Time Management for Profit (Career) and Fun (Personal)
   - Beyond the Resumes: An Inside Look for Students at What Recruiters Really Think
2. Attend 1 (ONE) company presentation before career fairs (e.g.: Spring Expo) **(5 p).**
   Please note: a maximum of 10 points can be earned with this type of activity (students can get credit for attending a maximum of 2 (two) company presentations).
3. Meet with a career consultant (CCO) to have your resume reviewed. Submit completed activity form and stamped/signed resume. **(5 p)**
   Please note: a maximum of 5 points can be earned with this type of activity (students can get credit for one resume review).
4. Meet/talk with an alumni/industry mentor of your choice for career advice **(5 p).** Include in the submitted activity form the name of your mentor.
   Please note: a maximum of 10 points can be earned with this type of activity (students can get credit for meeting with a maximum of 2 (two) mentors).
5. Watch any 2 videos developed by CCO for successful job search **(2.5 p)**. Include in the activity form the title of the videos and a short description (2 lines/video about usefulness for you).
   Please note: a maximum of 5 points can be earned with this type of activity (students can get credit for watching a maximum of 2 (two) CCO videos).
   Suggested videos (https://www.youtube.com/user/PurdueCCO/videos):
   - 5 tips for job search strategies
   - 5 tips for interviewing
   - 5 tips for resumes in 2020
   - 5 things you need to know about CVs
   - Career tips for international students
   - Searching and Applying to a Job
6. Attend 1 (ONE) Professional Development Workshop offered by the Purdue Graduate School. Submit completed activity form and proof of attendance (screenshot, or photo/selfie to show you, the presenter and other participants – for in-person events) **(10 p)**.
   Please note: This activity can be completed for credit multiple times, no limit.

   To reserve a spot for a workshop, follow these steps:

a. Follow the link https://www.purdue.edu/gradschool/professional-development/workshops/index.php and open an account. Choose "Other" when you are asked about your status and continue with account setup and registration for workshops.
b. Once you have an account, click on "Find courses" and browse available workshops

Some suggested workshops are listed below:

- Impostor Syndrome
- Time Management
- Budgeting and Saving Money
- Debt Management
- Credit Cards and Credit Scores
- Healthy Eating on the Run
- How to Deliver a Winning Presentation
- Eat Right When Your Budget is Tight
- LinkedIn
- Success Over Stress
- Entrepreneurship as a Career Path
- Comparing Job Offers
- Sleeping for Success
- Breakout from Burnout

7. Watch a motivational TEDTalk (https://www.ted.com/talks) on Career Success, or a TEDTalk on Time Management or Positive thinking/Positive mindset. Submit a completed activity form and provide full reference to the video/TEDTalk (include the link and speaker name). **(2.5 p).**
   Please note: a maximum of 5 points can be earned with this type of activity (students can get credit for watching a maximum of 2 (two) TedTalks in this category).
8. Read a peer reviewed article on professional development/life-long learning/career preparation, etc. Submit a completed activity form and provide full reference to the article (also include the link for online sources). **(10 p).**
   Please note: (1) This activity can be completed for credit multiple times, no limit.
   (2) Blogs and short information found on the internet will count for credit.
9. Attend a Purdue sponsored event related to career readiness/life-long learning. **(10 p)**
   Examples: Old Masters, Women in Engineering sponsored events (with invited speakers, not group meetings), AIChE Student Chapter sponsored event (not all events qualify for 10 points; the instructors will evaluate the events and communicate to the class the number of points that can be earned for participating in a specific event), other Professional Organizations sponsored events (send information to the instructor for evaluation and point allocation). Reference the events and submit the completed activity form **and** proof of attendance. Callout events for clubs or organizations and group meetings without educational value can't be attended for credit.
   Please note: This activity can be completed for credit multiple times, no limit.

The use of ChatGPT and other AI agents for generating any part of any assignment is expressly forbidden.

If you find an activity of interest that is not listed here, but you want to complete for credit, please contact the instructor at nagyg@purdue.edu to review your choice before completing it. Once approved, the activity can be completed for credit.

B. Contemporary Issues in Chemical Engineering (max 25 points in this category)

The activities in this section/category are meant to broaden students' view and make them familiar with contemporary issues and advances in the field of chemical engineering, including research, new trends and research directions, initiatives in industry on topics like sustainability and environment, climate change, alternative energy solutions, biotechnology, pharmaceuticals, etc.

Although you can complete activities in any combination to earn points towards the maximum 25 points applicable for this section, to make the most of this section, it is recommended that you complete a variety of activities.

Please note: Students must earn a minimum of 10 points in this category by 11:59 pm on **March 13** to avoid the late submission penalty for this deadline. Assignments submitted after March 13 will be penalized 50% until the 10 points requirement is met in this category.

1. Visit https://www.aiche.org/academy and browse available resources. Complete any relevant activity and submit a completed activity form, along with the PDF of the *AICHE Certificate of Professional Development Hours* (PDHs), received upon completion. **(10 p)**.
   Please note: (1) This activity can be completed for credit multiple times, no limit.
   (2) Recorded videos/webinars that do not provide a *Certificate of Professional Development Hours* (PDHs will not be accepted for credit.

   Some suggested topics:
   - A Perspective on the World's Energy Challenge
   - Multifactor Experiment-Design for Process Development
   - Solar Based Sustainable Energy Solutions
   - No Greenhouse Gas Warming in Tiny Towns in USA
   - Embedding Sustainability in GlaxoSmithKline's Operations
   - Plastics Circularity Issues and Dow's Response
   - Plastic Waste: A process-based approach to solutions
   - Sustainable Aviation Fuel with Carbon Capture
   - Concentrating Solar Power: Solar Energy on Demand
   - How Chemical Engineers Can Contribute Sustainable Solutions to the PFAS Problem
   - Hydrogen: Myths and Realities
   - Purifying Water in Developing Countries
   - Algae - The New Green Crude
   - Green Engineering: Perspectives, Challenges and Tools
   - Solutions for a Sustainable Tomorrow
   - New Materials for Membrane Separations
   - AIChE course ELA132: AIChE's An Introduction to Large-Scale Energy Production
   - AIChE course: ELA401: CCPS's Risk Based Process Safety Decision Making for All Engineers
   - AIChE course: ELA137: AIChE's Fundamentals of Climate Change and Mitigation
   - Current Challenges in Global Waste Plastic Management

2. Read a peer reviewed, journal article on a contemporary issue (e.g.: alternative energy sources, tackling climate change, sustainability, etc.) in chemical engineering. Submit a completed activity form and provide full reference to the article (also include the link for online sources). **(10 p).**
   Please note: (1) This activity can be completed for credit multiple times, no limit.
   (2) Blogs, and short information found on the internet will count for credit.

3. Attend a ChE Graduate Seminar (typically offered Tuesdays & Thursdays from 3-4:15 pm in FRNY G140). Invited speakers present on cutting edge research topics. Please check the most up-to-date seminar schedule online at: https://engineering.purdue.edu/ChE/aboutus/seminars or contact Bev Johnson at bevjohnson@purdue.edu for last minute updates. **(10 p)**
   Please note: (1) This activity can be completed for credit multiple times, no limit.

(2) Seminars with no scientific content will not count for credit in this category, but may qualify for credit in another category (watch for announcement and email communication from the instructor).

4. Watch a short video or TEDTalk (https://www.ted.com/talks) on sustainability, alternative energy, or climate change. Submit a completed activity form and provide full reference to the video/TEDTalk on the form (include the link and speaker name). **(2.5 p).**
   Please note: a maximum of 5 points can be earned with this type of activity (students can get credit for watching a maximum of 2 (two) TedTalks in this category).
5. Attend a Purdue sponsored event relevant for this topic – watch for schedule published by Purdue throughout the semester and for announcements posted on Brightspace. Submit a completed activity form and include a photo/selfie as proof of attendance. **(10 p)**
   Please note: This activity can be completed for credit multiple times, no limit.

The use of ChatGPT and other AI agents for generating any part of any assignment is expressly forbidden.

If you find an activity of interest that is not listed here, but you want to complete for credit, please contact the instructor at nagyg@purdue.edu to review your choice before completing it. Once approved, the activity can be completed for credit.

C. Engineering Ethics (max 25 points in this category)

The activities in this section/category are meant to strengthen your ethical responsibility as aspiring young chemical engineering professionals. Each engineering profession has their own Code of Ethics, and the American Institute of Chemical Engineers (AIChE) is no exception. You can find the AIChE Code of Ethics here: https://www.aiche.org/about/governance/policies/code-ethics. Please familiarize yourselves with this code and apply these principles throughout your career.

Although you can complete activities in any combination to earn points towards the maximum 25 points applicable for this section, to make the most of this section, it is recommended that you complete a variety of activities.

Please note: Students must earn a minimum of 10 points in this category by 11:59 pm on **March 13** to avoid the late submission penalty for this deadline. Assignments submitted after March 13 will be penalized 50% until the 10 points requirement is met in this category.

1. Visit https://www.aiche.org/academy and browse available resources. Complete any relevant activity and submit a completed activity form, along with the PDF of the *AICHE Certificate of Professional Development Hours* (PDHs) received upon completion. **(10 p)**.
   Please note: (1) This activity can be completed for credit multiple times, no limit.
   (2) Recorded videos/webinars that do not provide a *Certificate of Professional Development Hours* (PDHs will not be accepted for credit.

   Some suggested topics:
   - A "Virtuous" Approach to Ethics & Engineering
   - Ethics and Excellence in Engineering
   - Ethics and Excellence in Engineering (2016 Edition)
   - Using Ethics to Support Excellence in Reliable and Safe Operations
   - Ethics are Changing and What Does That Mean for Engineers and Leaders Working in a Global Economy - *This activity can also fit in category D; students can only submit this activity in one of the categories, not both*
   - Engineering and Science Publication Practice and Ethics

- Explosion at T2 Laboratories
- Right-Sizing Lab Fixed Bed Reactors for Gas-Solid Systems
- Engineering Ethics: Challenges for Innovation and Society

2. Complete an e-learning SAChE course from the "SAChE Certificate Program" available on AIChE Academy **(15 p)** and submit a completed activity form and the PDF of the SAChE Certificate received upon completion.
   Please note: (1) This activity can be completed for credit multiple times, no limit.
   (2) Courses ELA950 (An introduction to process Safety) is not accepted for credit

3. Read a peer reviewed, journal article/case study on engineering ethics. Submit a completed activity form and provide full reference to the article (and the link for online sources). **(10 p).**
   - Suggested article: "*Ethics – Examining Your Engineering Responsibility*" by Deborah L. Grubbe (https://www.aiche.org/sites/default/files/cep/20150221.pdf

   Please note: (1) This activity can be completed for credit multiple times, no limit.
   (2) Blogs and short information found on the internet will count for credit.

4. Read an engineering ethics related book. Submit a completed activity form with reference to the book (including the link (for online books) so the source can be checked, or a photo of the physical book) **(10 p).**
   Please note: This activity can be completed for credit multiple times, no limit.

5. Watch a short video or TEDTalk (https://www.ted.com/talks) on ethics/engineering ethics. Submit a completed activity form and provide full reference to the video/TEDTalk (include the link and speaker name). **(2.5 p).**
   Please note: a maximum of 5 points can be earned with this type of activity (students can get credit for watching a maximum of 2 (two) TedTalks in this category).

6. Attend a Purdue sponsored event relevant for this topic – watch for schedule published throughout the semester and for announcements posted on Brightspace. Submit a completed activity form and include a photo/selfie as proof of attendance. **(10 p)**
   Please note: This activity can be completed for credit multiple times, no limit.

The use of ChatGPT and other AI agents for generating any part of any assignment is expressly forbidden.

If you find an activity of interest that is not listed here, but you want to complete for credit, please contact the instructor at nagyg@purdue.edu to review your choice before completing it. Once approved, the activity can be completed for credit.

D. Engineering in a Global Environment (max 25 points in this category)

The activities in this section/category are meant to bring awareness and appreciation of the many cultural differences that are encountered within the university setting and beyond. It is the instructors' hope that activities in this section will bring awareness, understanding, and highlight areas for growth, as students prepare to thrive in a diverse, global environment upon graduation and apply this knowledge throughout their career.

Although you can complete activities in any combination to earn points towards the maximum 25 points applicable for this section, to make the most of this section, it is recommended that you complete a variety of activities.

Please note: Students must earn a minimum of 10 points in this category by 11:59 pm on **March 13** to avoid the late submission penalty for this deadline. Assignments submitted after March 13 will be penalized 50% until the 10 points requirement is met in this category.

1. Visit https://www.aiche.org/academy and browse available resources. Complete any relevant activity and submit a completed activity, along with the PDF of the *AICHE Certificate of Professional Development Hours* (PDHs) received upon completion. **(10 p)**.
   Please note: (1) This activity can be completed for credit multiple times, no limit.
   (2) Recorded videos/webinars that do not provide a *Certificate of Professional Development Hours* (PDHs will not be accepted for credit.
   Some suggested topics:
   - Working Across Cultures
   - Dealing with Difficult People
   - Effective Communication-Driven Leadership Skills in a Dynamic Global Market
   - Ethics are Changing and What Does That Mean for Engineers and Leaders Working in a Global Economy - *This activity can also fit in category C; students can only submit this activity in one of the categories, not both*
   - Beyond unconscious bias training: What works?
   - Empathic Engineering
   - AIChE's Engineering Leadership Development (***Note:*** *completing this course will count for* ***15 points*** *towards the maximum 25 points in this category*)
2. Complete ANY of the CLIMAR modules available on Brightspace (Intercultural Learning Modules) and submit a completed activity form with what you learned, along with the PDF of the answers to the final assignment/capstone as proof of completion. See the description of the assignment in Brightspace. **(15 p)**
   Please note: This activity can be completed for credit multiple times, no limit.
3. Read a peer reviewed, journal article on global engineering issues. Submit a completed activity form and provide full reference to the article (also include the link for online sources). **(10 p).**
   Please note: (1) This activity can be completed for credit multiple times, no limit.
   (2) Blogs and short information found on the internet will count for credit.
4. Watch a short video or TEDTalk (https://www.ted.com/talks) on cultural differences, benefits and/or challenges of working in a global environment, empathy in engineering teams, or any relevant video to this category. Submit a completed activity form and provide full reference to the video/TEDTalk (include the link and speaker name). **(2.5 p).**
   Please note: a maximum of 5 points can be earned with this type of activity (students can get credit for watching a maximum of 2 (two) TedTalks/videos in this category).
5. Participate in a Minority Engineering Program or Women in Engineering Program sponsored event, related to this topic. Submit a completed activity form and include a photo/selfie as proof of attendance. **(10 p)**. Callouts do not count as special events thus cannot be attended for credit.
   Please note: This activity can be completed for credit multiple times, no limit.
6. Attend a Purdue sponsored event relevant for this topic – watch for schedule published by Purdue throughout the semester and for announcements posted on Brightspace. Submit a completed activity form and include a photo/selfie as proof of attendance. **(10 p)**
   Please note: This activity can be completed for credit multiple times, no limit.

The use of ChatGPT and other AI agents for generating any part of any assignment is expressly forbidden.

If you find an activity of interest that is not listed here, but you want to complete for credit, please contact the instructor at nagyg@purdue.edu to review your choice before completing it. Once approved, the activity can be completed for credit.

3.3 Quizzes

In addition to submission of completed activities, students are required to complete 2 (two) quizzes worth 100 points each. **The due date to complete the quizzes is Friday, March 13, 2026**. These quizzes are available on Brightspace, under Quizzes and account for 20% of the final grade. **The use of ChatGPT and other AI agents for completing quizzes is expressly forbidden.**

3.4. Grading

Final grade is based on the total number of points earned in the four activity categories listed above (80%) and the score earned in the 2 required quizzes (20%).

Please note: a minimum of 10 points worth of activities must be completed and activity forms submitted in EACH category, along with supporting documents (as applicable) by 11:59 pm on March 13 to avoid the late submission penalty for this deadline. Assignments submitted after March 13 are penalized 50% until the minimum 10 points requirement is met in the respective category. The second due date to submit completed activity forms is Friday, May 1.

Late submission of activity forms, after May 1, is accepted until May 3, but a 20% penalty is applied to the number of points earned for the respective activity, unless the late submission was previously discussed with, and approved by Dr. G. Nagy via email.

Late submission of completed quizzes, after March 13, is also accepted until March 15, but a 20% penalty is applied to the score earned for the respective quiz**.**

Details on grading, with final grade (letter grade) assignment as shown in Table 1:

Activities completed for credit in 4 categories:	**80%**	
A. Career Readiness and Life-Long Learning		(max. 25 points)
B. Contemporary Issues in Chemical Engineering		(max. 25 points)
C. Engineering Ethics		(max. 25 points)
D. Culture, Equity, Diversity and Inclusion		(max. 25 points)
Quizzes:	**20%**	
1. Renewable Energy Sources Quiz		(100 points)
2. Engineering Ethics Quiz		(100 points)
Total	**100%**	

Table 1: Letter grade assignment based on percentage achieved

A+ 100.0 - 95.0%	**B+** 85.0 - 88.4%	**C+** 75.0 - 78.4%	**D+** 65.0 - 68.4%	**F** < 58.4%
A 94.9 - 90.0%	**B** 84.9 – 80.0%	**C** 74.9 - 70.0%	**D** 54.9 - 60.0%	
A- 89.9 - 88.5%	**B-** 79.9 – 78.5%	**C-** 69.9 - 68.5%	**D-** 59.9 - 58.5%	

Revised Grades: Any requests for regrading must be made in writing, to Dr. Gabriela Nagy (nagyg@purdue.edu) within **48 hours** from when the score for an activity, or the score for a quiz was released on Brightspace. Requests received later than two days will not be accepted.

3.5. Course Communications

Brightspace: All course materials and announcements, etc. will be posted on Brightspace. Each student is responsible for confirming that they can access Brightspace.

E-mail: E-mail will be used for announcements and reminders from the instructor to the students enrolled in the course. Students are responsible to ensure that these emails are not being caught by any spam filtering software. Students not receiving these emails should confirm enrollment in the course with their ChE academic advisor.

3.6. Conduct and Academic Integrity

Academic integrity is one of the highest values that Purdue University holds. Individuals are encouraged to alert university officials to potential breaches of this value by either emailing integrity@purdue.edu or by calling 765-494-8778. More details are available on our course Brightspace, under University Policies and Statements.

We do not expect to have any unprofessional behavior or academic dishonesty issues in this class; however, our expectations and consequences are as follows:

Students are expected to behave professionally at all times, including during events attended as part of this class. An unprofessional behavior reflects not only on the student, but also on the instructors and on the School. Students will hear from a variety of informed and accomplished speakers who will broaden and improve their educational experience through a variety of presentations and events, and we consider it a high priority to treat these speakers with professional courtesy and respect.

The use of ChatGPT and other AI agents for generating any part of any assignment, or for completing quizzes is expressly forbidden. Any student caught submitting fabricated or false information about a completed activity will receive 0 (zero) points for that assignment and may be reported to the Director of Undergraduate Studies; this can result in failing the class.

3.7. Nondiscrimination

Purdue University is committed to maintaining a community which recognizes and values the inherent worth and dignity of every person and believes that intellectual and cultural diversity among its many members strengthens the institution, stimulates creativity, promotes the exchange of ideas, and enriches campus life. Purdue's nondiscrimination policy can be accessed at this link: http://www.purdue.edu/purdue/ea_eou_statement.html.

3.8. Students with disabilities

Purdue University strives to make learning experiences as accessible as possible. Students anticipating or experiencing physical or academic barriers based on disability are encouraged to contact the Disability Resource Center (DRC) at: drc@purdue.edu or by phone: 765-494-1247.

Students should also familiarize themselves with the Davidson School of Chemical Engineering specific procedures that need to be followed by students who have a Letter of Accommodation (LOA) from the Disability Resource Center (DRC). The information can be found here: https://engineering.purdue.edu/ChE/academics/undergraduate/ada-information-for-students

3.9. Major Campus Emergency

In the event of a major campus emergency, course requirements, deadlines and grading are subject to changes that may be necessitated by a revised semester calendar or other circumstances. Information about relevant changes in will be posted on Brightspace and emailed to the enrolled student e-mail list.
