Computer Engineering

Become an expert on computer systems and their components, including both hardware and software, through immersive, high-impact research and development.

JUMP TO: CAREERS CONNECT TRANSFER

Program Summary

As a computer engineer, you'll do more than just use computers — you'll design them. From creating the next wave of smartphones to building powerful systems that fuel innovation, learn how to blend hardware and software into game-changing solutions.

Quick Facts

- **Degree:** Bachelor of Science

Apply strengths in math and physics, sharpen your problem-solving skills and gain a broad understanding of people and how they use technology with opportunities to pursue advanced studies in artificial intelligence, compilers, graphics, networks, operating systems and security. Whether you're building smarter devices or making systems faster and stronger, a degree in computer engineering puts you at the heart of the digital revolution.

- **Location(s):** West Lafayette, Indiana
- **College/School:** Engineering

APPLYING

Applying to Engineering in Indianapolis

At our Indianapolis location, jumpstart your career with direct admission to your engineering major of choice. From day one, you enroll in computer engineering and follow a core curriculum similar to that of first-year engineering in West Lafayette. Your first year in Indianapolis includes courses in math, chemistry, physics, computer programming and communication.

Applying to Engineering in West Lafayette

To study computer engineering in West Lafayette, you will apply to the first-year engineering program. All engineering students in West Lafayette build a foundation for success by completing core first-year engineering curriculum before transitioning to a specialty major in the second year. Core curriculum includes courses in math, chemistry, physics, computer programming and communication skills, as well as introductory engineering coursework that explores career options to help you identify which specialty major is the right fit.

The priority application deadline for our engineering majors is Nov. 1. Applications received after Nov. 1 for this competitive major will be evaluated based on available space.

Possible Careers

Computer engineering students bring hardware and software to life through careers spanning nearly every sector of industry including:

- Artificial intelligence research engineer
- Cybersecurity analyst
- Hardware engineer
- Network engineer

- Renewable energy engineer
- Robotics engineer
- Software developer

Transfer to Computer Engineering

Purdue admits to individual majors. Transfer students must meet Purdue's overall transfer criteria, as well as any major-specific requirements. Before you apply, check the closed programs page to confirm this major is open to transfer students. If it is, refer to the information below for major-specific transfer criteria.

- Minimum 3.0 GPA
- For detailed admissions requirements to transfer into any of Purdue's engineering majors, review our engineering transfer criteria.
