VIP Syllabus Fall 2025 VIP
Team: SoCET – Intro Specific

VIP 17912, 17911, 17910, 27920, 379X0
https://engineering.purdue.edu/vip/

Course Information

- **CRN:** see https://engineering.purdue.edu/vip/register
  - Meeting day(s) and time and Instructional Modality
    - **Lecture**: Hybrid (Professional Development)
    - **Lab (Team): Instruction Modality**: Normally Face-to-Face, Sync-Online when necessary
- **Dates of instruction:** August 25th – December 13th (16 Weeks)
- Course credit hours:
    - One credit hour: VIP 17911, VIP 17912, VIP 17910
    - Two credit hours: VIP 27920, VIP 37920
    - Zero credit hours: VIP 37900

Course Description

This course provides an opportunity for undergraduate students to engage in authentic and extended research and design projects related to active research areas of Purdue faculty members and national, international, and industry-sponsored design challenges. Students will work on interdisciplinary and vertically integrated teams (first-year through seniors) with faculty and graduate student mentors to address these real-world research and design challenges. Students registered for VIP credit will participate in weekly lectures and professional development activities that include topics related to design, research, documentation and technical writing, communication, leadership and teamwork, ethics, project management, intellectual property, information literacy, and introduction to a broad range of applicable research topics, technologies, and development tools.

[Intro Specific] SoCET is a program created to equip students with skills in one or more specializations related to SoC design that are in high demand both in industry and research. However, students in their freshman or sophomore years typically do not have enough background to contribute effectively on most SoC design projects. Because of this, Intro to SoCET was created to equip students to join design teams in SoCET earlier than would otherwise be possible.

[0 credit VIP 37900 (i.e., volunteers)] Parts of this syllabus are also applicable to 0cr SoCET volunteers. Assessment (sat/unsat) of volunteers is limited to participation and contributions to achieving team goals. Expectations of volunteers are minimal, but even volunteers should be participating in over half of team meetings and there should be evidence that they are contributing to the efforts of at least one project team.

Getting SoCET team support

Your sub-team leader is *usually* the "first person" to contact if you need resources or assistance.

Questions regarding grades outside of your sub-team (Design Logs, PD Plan, PD Requirements, Main team meeting) should be asked to either the Design Log grader or an Admin.

[Virtual Office Hour on MS Teams] (given the matter is outside of the expertise/responsibilities of your sub-team lead) will be handled by SoCET Admin Group TAs. TAs will rotate every weekday answering general questions on Teams in "Virtual Office Hour" channel.

This should not stop you from emailing the primary instructor, but there is a good chance the instructor will direct you to Admin Group TAs or your sub-team lead for many issues.

The following are guidelines for project support requests that will enable team leaders and even other team members to be the most effective in giving help.

1. A Direct message in Teams. The following info will help us to help you.
    a. Screenshots of error logs, files, simulations, layouts, etc.
    b. Provide an estimate of how much time a team lead should spend to resolve/ learn more about the issue (If you have no clue, write: 1 hour).
    c. Give your best guess for what you think is wrong. If possible, please include links that have guided your understanding of the problem. These are not required but can help everyone get up to speed!
2. If it is the morning after you have messaged team leaders on Teams (assuming you sent the message before 4pm ET) and they have not responded, please send them an email with "**STUCK**" in the subject line of the email. Keep in mind that your sub-team leader (especially volunteers) may not be able to respond immediately, but it is still useful for them to know if you are stuck. In the body of the email please:
    a. Mention how long you have been stuck & unable to resume progress.
    b. State whether you have another task that you can work on while waiting to hear back. If you don't have a good backup task, there is a good chance we will have something for you to research that would benefit the team once the new information has been documented/ presented.

Learning Outcomes:

All students in SoCET, will make progress on the VIP program learning outcomes listed below, but **this progress is not directly assessed for students other than senior design students.** A student who successfully fulfills the ECE senior design requirements will have demonstrated all of the following outcomes over the two senior design semesters:

i. an ability to apply engineering design to create a product (e.g., device, system, process, software, etc.) that meets the specified needs of this engineering design experience with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
ii. an ability to develop and conduct experimentation, analyze, and interpret data, and use engineering judgment to draw conclusions related to the development of the product of this engineering design experience.
iii. an ability to identify, formulate, and solve complex engineering problems arising from this engineering design experience by applying principles of engineering, science, and mathematics.
iv. an ability to function effectively in a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives associated with this design experience.
v. an ability to communicate effectively with a range of audiences appropriate to this design experience in both a written report and oral presentation.
vi. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies to complete the engineering design experience associated with this course.
vii. an ability to recognize ethical and professional responsibilities associated with this engineering design experience and make informed judgments which must consider the impact of the product of this engineering design experience in global, economic, environmental, and societal contexts. **[Assessed only for VIP students, but such responsibilities must be considered by all team members]**

Project goals specific to Intro to SoCET:

The overall technical goal of the SoC team (AKA SoCET) is to produce a family of microcontrollers on custom silicon for which the architecture and implementation is entirely under the control of the SoC team so that it can be adapted to whatever needs arise. The general target is to evolve the SoC design to the point where students can use to implement embedded system projects that call for a general-purpose microcontroller.

However, potential project sponsors or research collaborators may present requirements to which the SoC can be adapted.

The educational goal of the SoC team is to give all team members project experience that comes as close to an industry style development team as we can make it. The industry experience includes team management, data and repository management, documentation, and application of industry grade design verification techniques.

Intro I:

Intro I operates as a primarily lab-based course, where you will individually complete labs spanning the breadth of SoCET. Intro I serves as a fast-track into topics taught in future classes and/or a way to get experience using industrial tools. To help complete these labs and the VIP requirements, you will also be in groups of 4-6, where you can collaborate and share information on each lab, work on your project, and create your presentation.

There are 12 sessions, with 6 different specialized topics, each topic having 1-3 labs to be completed.

1. Basic Circuits (2k1/2k2 adjacent)
2. Digital Design (270 adjacent)

3. Systems (362 adjacent)
4. PCB (477 subtopic)
5. Physical Design (559/51214 subtopics)
6. Analog Design (559/51214 subtopics)
7. Design Flow

All 1-credit students (17911, 17912, and 17910) are required to complete all labs corresponding to 1 and 2, as well as all the labs of two other topics (e.g. 1, 2, 3, 5).

All 2-credit students (27921) are required to complete all labs corresponding to 1 and 2, as well as labs of four other topics (e.g. 1, 2, 3, 4, 6, 7).

Labs in categories 1 and 2 are due the week after each lab demonstration. The rest of the labs will be due at the end of this semester. We will grade and give feedback at the end of each week, and labs that have been completed with points deducted can be resubmitted at any time for more credit.

In addition to the labs, as a group, you will come up with a small project that you will finish by the end of the semester. This project should be of reasonable complexity (something simple that can be completed by the end of the semester) and should use the content you learn from completing your labs. At that time, you will create a project proposal that will be reviewed for feasibility. Projects include but are not limited to:

- UART bus model.
- PCB test board.
- Simple assembly program (e.g. merge sort).
- Physical 4-bit RCA (Ripple Carry Adder).

The project also entails a short presentation (to be done in class) and a final reflection to be submitted at the end of the semester.

Intro II:

SoCET: Intro II serves as an opportunity to hone skills learned in prior courses and/or **SoCET: Intro I** by developing an **application-specific integrated circuit** (ASIC) from scratch. Ultimately, SoCET: Intro II immerses students in the complete **ASIC design flow** by allowing them to work throughout the semester in groups of four to **propose**, **design**, **implement**, **verify**, and **validate** a digital design of their choice. The scope and scale of the designs will be approved and monitored by a combination of SoCET personnel, including track leads, teaching assistants, volunteers, and peers. Furthermore, these monitoring mechanisms present teams ample opportunity to develop their professional skills by presenting their work in initial, midterm, and final **design reviews**, where teams will be provided feedback on both their technical work and communication abilities. To further enhance students' ability to communicate technical content, teams will also be required to select an additional medium to present their projects to a broad, general audience in the form of an academic poster, live, or recorded presentation akin to undergraduate research and internship experiences on campus.

Software Tools

The software tools will vary based on the project. However, in general, the course and teams will use the following software tools:

- **SharePoint home page**: Sharepoint is the primary source of SoCET team technical and administrative documentation. (If you need to access this page from an off-campus network, you will need to use a VPN service offered by your campus. Please refer to your campus VPN documentation for help setting that up.) At the end of 2023, Purdue phased out Confluence Wiki which was the previous location for SoCET documentation. All the Confluence SoCET Wiki contents have been migrated to SharePoint.
- **Microsoft Teams** is used extensively to coordinate work by the sub-teams. See bottom of the SoCET home page for details.
- A wide variety of IC design and simulation tools, depending on one's project and sub-team
- **Brightspace**: Within Brightspace, you will have access to course announcements, schedules, assignments, grades, feedback, and course resources. *Preferred browser:* ITaP recommends Google Chrome or Mozilla Firefox when accessing Brightspace.
    - For Overall Course Announcements and Professional Development (PD) opportunities: Fall 2024 VIP PD - Merge
    - For lab/team: Fall 2024 VIP *SoCET* - Merge
- **Zoom** for online meetings:
    - https://purdue-edu.zoom.us/j/92377223532?pwd=NXZQMjBydE9XRlQ0ZGxxK0s2aGFtZz09
    - Meeting ID: 923 7722 3532
    - Passcode: 463710
- **asicfab** SoCET development server, where your work should be done.
- **Thinlinc** for access asicfab:
    - ThinLinc is a remote desktop software solution that allows users to access remote computers or servers. It's used at Purdue University for remote access to certain computing resources.
    - Students can use ThinLinc(See **Remote access) to log in to server address: **desktop.ececomp.ecn.purdue.edu** (Recommend using Thinlinc Client software).
    - ThinLinc & asicfab setup instructions for SoCET users can be found here after granted access https://purdue0.sharepoint.com/sites/ENGR-ECE-O-SOCET/SitePages/Initial-Setup-Instructions.aspx
- **CATME**: You will use CATME to submit information used for Peer & Team Evaluations (Link to CATME). *[Only required for VIP students, but all are encouraged to participate]*
- MS Office: Word, Excel, and PowerPoint.
- Adobe: PDF
- Qualtrics surveys

Other Team Resources and Texts

- Required texts: There are no required texts for participation in this team, but sometimes, resources will be identified for your study and reference.
- ** Remote access: Compute servers that permit remote access to desktop sessions are available. See https://engineering.purdue.edu/ECEIL/Lab_Support/EDA/thinlinc.html for details.
- Additional readings: For RTL design (after ECE337) on larger projects "The Simple Art of SoC Design" by Michael Keating https://link.springer.com/book/10.1007%2F978-1-4419-8586-6 is very helpful.
- FPGA development boards: These will be issued as needed to team members.
- Lab bench space and instrumentation: Made available on an as needed basis.

Attendance Policy

Attendance at all sub-team meetings and main team meetings are required.

The most recent updates related to attendance includes the addition of a Medically Excused Absence Policy for Students (MEAPS) among reasons to be granted an excused absence from class – in addition to Grief/Bereavement, Military Service, Jury Duty, Parenting Leave. MEAPS guidelines are covered in the Attendance section of Academic Regulations, and some clarification is offered on the ODOS website, since students must work with ODOS for any of these excused absences. MEAPS may be an option for students who must miss class for emergent or urgent care.

Within the VIP course, you will be working in teams on a project. Your project work, both individually and as part of the team, is the most significant aspect of the course. Thus, you are expected to participate in all scheduled (virtual or in-person) VIP team meetings (the lab portion of your VIP course), as well as any sub-team meetings. Meetings will be conducted via in-person or virtually on Teams, Zoom, or other tool(s) as designated by your VIP team mentor and/or decided by you and your project team. This expectation aligns with Purdue's academic regulations regarding attendance, which states that students are expected to be present for every meeting of the classes in which they are enrolled. When conflicts or absences can be anticipated, such as for many University-sponsored activities and religious observations, you should inform the team mentors (instructors) and teammates of the situation as far in advance as possible. Furthermore, you are responsible for knowing what occurred in that meeting (typically by discussing it with other team members) and how you can contribute to the project and team until the next meeting. An excused absence does not relieve you of that responsibility.

For unanticipated or emergency absences when advance notification to the team mentors (instructors) is not possible, you should contact the instructor as soon as possible by email or phone.

If you are unable to make direct contact with the instructor or to leave word with the instructor's department because of circumstances beyond the you, and in cases falling under excused absence regulations, you or your representative should contact or go to the Office of the Dean of Students website to complete appropriate forms for instructor notification. Under academic regulations, excused absences may be granted for cases of grief/bereavement, military service, jury duty, parenting leave, and emergent or urgent care. For details, see the Academic Regulations & Student Conduct section of the University Catalog website.

SoCET Graded Assignments

Most assignments are due on Sundays at 11:59pm at the end of the indicated week. Details on these assignments, including a schedule of due dates, **rubrics** to guide evaluation, and guidelines for participation and documentation will be posted on Brightspace. VIP students registered for zero-credit will only be assessed on participation and progress on project.

Assignments & Projects	Due Week [Due Date]
SoC Topic Presentation or Video	Weeks 3-15, usually in main team or sub-team meeting
Project Overview, Goals, Timeline	End of Week 2 in Design Log
Completion of VIP midterm documents/surveys **[VIP ONLY]**	End of Week 4
Weekly Design log – midterm (weeks 3-8) and end of semester weeks (9-15)	Due before team meeting each week
Participation – midterm and end of semester	Every main team and sub-team meeting
Progress on project – midterm and end of semester	Continuous
Intro I Project Report/Reflection **[Intro I Only]**	End of Week 15
End of Semester completion of VIP requirements, documents, surveys **[Intro II & VIP ONLY]**	End of Week 15
End of Semester Technical Documentation **[Intro II & VIP ONLY]**	11:59pm, last regular day of classes
End of Semester Individual report **[Intro II & VIP ONLY]**	11:59pm, last regular day of classes

- **SoC Topic Presentation:** Starting the 3rd week non-zero credit students should arrange to present on a System-on-a-Chip related topic to your sub-team. It can be an individual or a small group presentation.
    - The topic can be related to the task you are working on under a specific sub-team. New members on the 'Intro to SoCET' sub-team can select a topic that can present what they have learned in the Intro tutorials or research to present a topic of general interest to the team, subject to mentor or instructor approval.
    - A group presentation should be approximately 5 minutes per person presenting and be prepared in PowerPoint. An individual presentation should be approximately 10 minutes.
    - If your project requires you to give a design review, that can take the place of this presentation. A design review is significantly longer and more detailed than the normal topic presentation.
    - If it is not possible to give a live presentation, prepare a video.
    - Do not assume your audience has the same background as you. Make sure to include any background material that would be useful to others.
    - Submit the topic and date you presented it, on Brightspace via the scheduled assignment.
- **Project Overview, Goals & Timeline:** Once you are on the team and given your project you will need to post the following at the top of your design log:
    - Overview explaining what your project is.
    - What are your specific goals for this project.
    - At a minimum, set a timeline listing what you expect to complete at the end of each month. Milestones can be at intervals shorter than a month.
    - The goals and timeline you post may change overtime and this is all right. But you need to set a timeline for yourself and be able to explain why it changes if you are unable to meet your deadlines.
- **Design Logs:** They are an important part of SoCET. Think of your design log as a notepad where you take notes as you work through problems. You should document things like what you are trying to do, how you did it, if it worked, what the results are, and if you use any references. This way if you or another SoCET student needs to look back on what has already

  been tried and follow your logic they can. Your design log grade will reflect how well you follow these rules:
    - This is a part of your grade so make sure to update it weekly.
    - Include details and results for tasks, as well as approximations for how much time you spend on each task - this should not just be a list of tasks.
    - At the top of the page include your goals for the semester and a general overview of what you are doing, with your most recent updates above the others (newest at the top, oldest at the bottom).
    - **For volunteers, the design log is not mandatory but is still highly recommended and may be used to provide evidence of contribution.**

- **Participation (Attendance):** You will be graded on your attendance of the online general Thursday meetings and sub-team specific meetings **(accommodation for time zone differences, illness, and scheduling conflicts will be taken into consideration).** The purpose of this grade is solely to encourage students to make it to team and sub-team meetings - so that they are in the loop with the rest of the team. This grade will be based on the following:
    - In your design log, you will add notes highlighting what you learned in the meeting and comments or questions about the content. This will be part of log grading design.
    - To receive full credit for the main team meetings, in-person attendance at all weekly meetings is required unless excused by following instructions of the **Attendance Makeup Policy**. Excused absences or virtual attendance will be granted for exam conflicts, illness, or unavoidable circumstances.
    - Make sure you have charged your cell phone or any device for attendance purposes. If you did not manage to scan the QR code or click the attendance link during the meeting, you must reach out to attendance TA within 15mins after the meeting to get the QR code or link again for the week.

- **Attendance Makeup Policy**: You have two options to make up your attendance.
    1. Watch the meeting recording on SharePoint. When finished, send the attendance TA an email titled "**SoCET Meeting Makeup (<date>)"** sharing your query/highlight from the meeting. A short one to two paragraphs would do, but don't be limited in case you want to say more.
    2. Instructor office hours either online or in person for that week & we'll count it as participation. Send the attendance TA an email regarding the same, titled "**SoCET Meeting Makeup (<date>)**" once you've done it.
        - If you would like to request an excused absence, notification is required **no later than 10am** on the same day as the meeting to provide enough time for processing (exemptions for emergencies).

- **Additional Attendance Makeup Policy with Special Situation and Constraint**
    - For students under special situations who are unable to notify the meeting conflict with TA ahead of time (e.g. Have onsite job) or with certain constraint(commute), the exception for makeup is possible with limit. Students can request makeup for no more than 6 meetings out of 14 total attendance each semester. It is the student's responsibility to notify attendance TA within 48 hours with written communication regarding the situation. Failure to notify attendance TA within 48 hours will be considered late submission, which will not be accepted.

- **Progress:** This is an evaluation of whether you are on track to completing your outlined semester objectives. Participation in sub-team meetings is also factored into this grade. Remember that unexpected roadblocks are considered. For example, if it took 3 weeks to finish a task that you expected to finish in 1 week due to the complexity of the problem, your grade will not suffer provided that your mentor or instructor are aware of the situation as it happens and agree to adjust the expectations. This grade's intention is to reflect whether you have made contributions each week that get you closer to completing your goals for the semester.

- **Poster Presentation:** Near the end of the semester, non-zero credit VIP students will be required to present a poster of your work thus far at an undergraduate research symposium. Other undergraduates have the option of presenting if they so choose.
    - Who will you present with?
        - If you are on a Sr. Design team your group will create your own poster focusing on your senior design project.
        - If you are not a Sr. Design VIP student, you will create a single poster for the entire sub-team.
    - Poster
        - A single PowerPoint slide
        - The end of the semester version will be submitted to the undergraduate research expo.
        - The undergraduate research expo version will require a 10 min audio file.
        - If you are a graduate student collaborating with an undergraduate team, your work can be included in the undergraduate poster.
        - If you are a graduate student working alone or with other graduate students, prepare a poster and give a 10-minute presentation of the poster to the team OR give a SoC topic presentation to the team.
- **Mid & End of Semester VIP Requirements:** Towards the middle and end of the semester you will be expected to complete the following through the VIP Brightspace page.
    - Personal Development Plan progression
    - Self-reflection & progression paper
    - CATME Survey
- **SoCET SharePoint Documentation:** The SharePoint documentation is to function as a kind of spec sheet describing your contributions to the project. The purpose of this is to maintain documentation of what is under development on the chip so future students can read the wiki page, understand what is being developed, what are the goals and what development status is now. If documentation on your work already exists do not create a new page for it,

  just contribute to the existing page. If you developed something as a team then you all should work on the documentation together, you do not each need to make your own documentation. Submit the links to your wiki contributions on Brightspace via the scheduled assignment.
- **[VIP-SoCET] Individual report.** A 2–4-page document that is a self- assessment of your accomplishment and what you learned. Sample reports are provided.

Grading

Grading for SoCET includes general VIP requirements, but the grade computation scheme is specific to SoCET. The sub-team leaders will assist in the assessment of your performance, but final grades will be determined by the primary instructor.

The number of credit hours are not directly entered into the grade calculation. Instead, your final goals for the semester will be considered when deciding on final goals for the semester and in our assessment of your progress towards those goals. During the semester, if the goals prove to be either too demanding or too easy relative to your academic level and number of credit hours, team leaders will work with you to recalibrate your goals.

Each gradable item will be given a letter grade mapped to points in overall grade calculation. +/- grades may be assigned if quality of work falls in between the categories below.

Above and beyond requirements = A+
Meets/exceeds all requirements = A
Meets requirements with minor deficiencies = B
Requirement is completed, but significant room for improvement = C
Required item was attempted but does not satisfy any requirements = D
Has done little or nothing = F

When computing a final score, each item will receive a percentage credit based on the following table where a "+" adds 5% to the grade, and a "-" will reduce the credit by 5%.

Letter grade for graded item	% of possible points to be awarded
A+	105%
A	100%
B	85%
C	70%
D	55%
F	0%

At midterm and end of semester, your overall score for the semester will be graded according to the following weights. Note: these weights do not necessarily add up to 100 due to different requirements for different categories of team members.

Assignments and Projects	Weights (Intro I)	Weights (Intro II)	Weights (Intro II, Vol)
Mid-Semester VIP Requirements	P/F (70%)	P/F (70%)	-
End-Semester VIP Requirements	P/F (70%)	P/F (70%)	-
Professional Development Plan	5	5	-
Design Logs	15	15	-
Main Team Meeting Attendance	10	10	10
Sub-Team Progress (Labs, Attendance)	50	50	50
Intro I Project Presentation	10	N/A	-
Intro I Final Docs/Project Report	10	N/A	-
1st Oral Presentation or Design Review	-	5	5
2nd Oral Presentation or Poster Presentation	-	5	-
Final Documents (Individual Report & Documentation/Tech Docs)	-	10	-
Total	100	100	65

When the total score is computed, the final letter grade will be assigned on the following scale. "+" or "-" grades may be assigned for a score that is slightly below a breakpoint.

If you do not complete all the applicable highlighted items, your grade will be reduced by one fraction of a letter grade, e.g., A drops to A-, A- to B+ , etc.

Percentage Range	Letter Grade for regular VIP	Satisfactory / Unsatisfactory for volunteers
>= 100, and all applicable highlighted items completed.	A+	Satisfactory
>= 95, and all applicable highlighted items completed.	A	Satisfactory
>= 80, and all applicable highlighted items completed.	B	Satisfactory
>= 65, or some applicable highlighted items incomplete.	C	Satisfactory
>= 50	D	Instructor Discretion
<= 50	F	Unsatisfactory

Mid-semester and end of semester VIP requirements include:

1. Document individual contributions to the project and team in format as required by your project mentor(s).
2. Contribute as appropriate to project documentation, presentations, publications, and/or poster
3. Submit Professional Development plan by Friday, January 31st at 11:59 pm and complete PD activities, including the Welcome to VIP lecture.
4. Complete mid-semester Individual Performance Evaluation (IPE) by Friday February 28th at 11:59 pm in Brightspace.
5. Complete Final Individual Performance Evaluation (IPE) & PD Reflection (PDR) by Friday, May 2nd at 11:59 pm in Brightspace.
6. Complete mid-semester and final peer evaluation of team members in CATME (mid-semester due Friday, February 28th at 11:59 pm and final peer evaluations due Friday, May 2nd at 11:59 pm.
7. Complete the final Purdue course evaluation and submit screen shot of completion to Brightspace (due Friday, May 2nd at 11:59 pm).

Professional Development (PD) Plan

To support your success on your project and your team, and overall, in your career and your life, you will create an individualized Professional Development Plan. For all students *except* for those enrolled in VIP 17910, 17911 or 17912, the plan is expected to incorporate ten (10) Professional Development (PD) activities that can be completed throughout the semester and include the three required activities: the Welcome to VIP "lecture" and the two Communication activities. For students enrolled in VIP 17910, 17911 and 17912, the PD Plan only needs to include the *three* required activities. Most VIP students on West Lafayette teams typically participate in the Purdue Undergraduate Research Conference through the Office of Undergraduate Research (OUR) to complete the abstract and presentation requirements. Although students on VIP teams in Indianapolis can also participate in the OUR conference, they are expected to participate in the EPICS/VIP Poster session in Indy as well. Other activities designated and approved by the instructor can be used to satisfy this requirement.

Track/Topic*	***Activity***
1. PD (Required)	*Welcome to VIP*
2. Communication (Required)	*Research Conference – Application submission*
	Indy EPICS/VIP Poster abstract submission
Complete instructor approved option for your project	*Instructor designated activity*
3. Communication (Required)	*Research Conference – Poster Session/ Research Talk*
	Indy EPICS/VIP Poster Session
Complete instructor approved option for your project	*Instructor designated activity*

The remaining seven activities are to be chosen by the student, depending on their interest and what would be most beneficial for their work on a specific team. Please see the Team Expectations Section below for specific suggestions for this team.

The VIP PD Brightspace site hosts a variety of Professional Development videos and information on interactive workshops and live presentations that will be offered this semester. Students should browse the materials and talk with their mentors during the first week of the semester to create their individual Professional Development (PD) Plan and to ensure that project and lab requirements are met. The PD plan should be submitted on the team Brightspace by **Friday, September 12th**. Students may update their plans as needed during the semester without resubmitting to Brightspace.

Students will be expected to document their participation in each of the activities via the assignments posted in their team Brightspace, as well as in the Midsemester Individual Performance Evaluation (IPE) and the Final IPE & PD Reflection assignments.

Academic Integrity and Professional Responsibility

Academic integrity is one of the highest values that Purdue University holds. The VIP Program expects every member of the Purdue community to adhere to the Purdue Honor Pledge ("As a boilermaker pursuing academic excellence, I pledge to be honest and true in all that I do. Accountable together - we are Purdue.") and practice honorable, ethical, and professional behavior both inside and outside the classroom. In VIP, students are encouraged to work together and share information. When indicated, students and teams are allowed to modify previous versions of documents to be submitted for the current assignment. However, it is unacceptable for students to claim individual work that is not their own or to use sources without appropriate citation. It is also unacceptable for students to misrepresent information to their instructional staff, their team, and/or their client. In addition, misuse of VIP resources is considered dishonest. At the instructor's discretion, instances of academic dishonesty will result in a reduced score, a zero score, or a failing grade for the course. All occurrences of academic dishonesty will be reported to the Office of Students Rights and Responsibilities (OSSR) and the students' respective schools. If there is any question as to whether a given action might be construed as academic dishonesty, please see the instructor or the teaching assistant before you engage in any such action.

Nondiscrimination Statement

Purdue University is committed to maintaining a community which recognizes and values the inherent worth and dignity of every person; fosters tolerance, sensitivity, understanding, and mutual respect among its members; and encourages each individual to strive to reach his or her potential. In pursuit of its goal of academic excellence, the University seeks to develop and nurture diversity. The University believes that diversity among its many members strengthens the institution, stimulates creativity, promotes the exchange of ideas, and enriches campus life. A hyperlink to Purdue's full Nondiscrimination Policy Statement is included in our course Brightspace under University Policies.

Accessibility

VIP, and Purdue University, strives to make learning experiences as accessible as possible. If you anticipate or experience physical or academic barriers based on disability, you are welcome to let us know so that we can discuss options. You are also encouraged to contact the Disability Resource Center at: drc@purdue.edu or by phone: 765-494-1247.

Mental Health/Wellness Statement

- **If you find yourself beginning to feel some stress, anxiety and/or feeling slightly overwhelmed, try** Therapy Assistance Online (TAO), a web and app-based mental health resource available courtesy of Purdue Counseling and Psychological Services (CAPS)**.** TAO is available to all students at any time by creating an account on the TAO Connect website, or downloading the app from the App Store or Google Play. It offers free, confidential well-being resources through a self-guided program informed by psychotherapy research and strategies that may aid in overcoming anxiety, depression and other concerns. It provides accessible and effective resources including short videos, brief exercises, and self-reflection tools.
- **If you need support and information about options and resources**, please contact or see the Office of the Dean of Students. Call 765-494-1747. Hours of operation are M-F, 8 a.m.- 5 p.m.
- **If you find yourself struggling to find a healthy balance between academics, social life, stress**, etc., sign up for free one-on-one virtual or in-person sessions in West Lafayette with a Purdue Wellness Coach at RecWell. Student coaches can help you navigate through barriers and challenges toward your goals throughout the semester. Sign up is free and can be done on BoilerConnect. Students in Indianapolis will find support services curated on the Vice Provost for Student Life website.
- **If you're struggling and need mental health services: Purdue University is committed to advancing the mental health and well-being of its students.** If you or someone you know is feeling overwhelmed, depressed, and/or in need of mental health support, services are available. For help, such individuals should contact Counseling and Psychological Services (CAPS) at 765-494-6995 during and after hours, on weekends and holidays, or by going to the CAPS offices in West Lafayette or Indianapolis.
- The Community, Assistance and Resources for Engineering Students (CARES) Hub is available to support the well-being of all engineering students. The CARES Hub, located in ARMS 1261 and 1264, is a welcoming, inclusive space for students to study, connect, grab a snack, and relax during the week. CARES also offers wellness activities, educational workshops, peer mentoring, social events, and on-site counseling. If you need help handling stress or working through a problem, schedule time with our CARES Hub therapist, Jennie Beutler, here or drop by ARMS 1251 to speak to Jennie without an appointment during her **Walk-In Hours** from 1:00 – 2:00 p.m. Monday-Friday. Please visit the CARES Hub webpage to *learn more. The CARES staff look forward to connecting with you!*
- *TaskHuman: On-demand access to wellness providers with 1000s of topics, day, or night*
    - Purdue users eligible for unlimited FREE coaching: https://taskhuman.com/referral/purdue
    - Good intro video: https://www.youtube.com/watch?v=eTeq8hApTNg

Emergency Preparation

In the event of a major campus emergency, course requirements, deadlines and grading percentages are subject to changes that may be necessitated by a revised semester calendar or other circumstances beyond the instructor's control. Relevant changes to this course will be posted onto the course website or can be obtained by contacting the instructors or TAs via email or phone. You are expected to read your @purdue.edu email on a frequent basis.
