IE 20000: INDUSTRIAL ENGINEERING SEMINAR
Fall 2025; CRN: 22013
Course Location and Time: WALC 1055; Thursdays 1:30 - 2:20 PM

Instructional Staff:

Name	Role	Office	Email	Office Phone	Office Hours
TBD	**Primary Instructor**				
TBD	Course Support				
TBD	Course Support				
TBD	Course Support				
TBD	Teaching Assistant				

Communication with Instructional Staff:
The primary contacts for this course are the Primary Instructor and Teaching Assistant. Any issues related to grades, deadlines, etc. should be first addressed to both the Primary Instructor and Teaching Assistant via email. If you wait longer than three (3) business days for a response, please contact the remaining course support. Typically, email is not checked on Saturday or Sunday. Please include "IE 20000" in the subject line for all course related emails.

Catalog Description:
An orientation course to inform students of the major options in the industrial engineering program, assistance in selection of appropriate electives to meet career objectives, introduction to the faculty, and selection of an academic advisor.

Course Coordinator Perspective:
This course is designed to orient students to opportunities and the discipline of Industrial Engineering (IE) both at Purdue and beyond through interactions with IE alumni, School staff and faculty, peer-mentors, and special guests. The alumni who visit the course are selected on numerous criteria, including professional achievement, years of experience, industries worked in, company representation, and many others. We do not control what they say (but do assist with planning their talk) as we want students to get a flavor for the discipline and personal and professional development necessary to pursue your goals. We also attempt to have students reflect on past, current, and future trends, so that you have additional information that might inform personal and professional development activities (including selecting electives, participation in student organizations, preparing for career fairs, etc.).
This course is worth zero (0) credit hours (yes, zero). As such, the requirements to pass the course will be very clear and reasonable with substantial opportunity to develop yourself if you

choose to do so. This course represents your best opportunity to "kick-off" your professional development journey within IE; however, that is a self-driven process, so this class is entirely what you make of it. **Even though this is a zero-credit course, passing it *is* a degree requirement for IE.** If you do not meet passing requirements, you will have to retake it to graduate.

Learning Objectives:

Have a good understanding of the Purdue IE program;
Have a good understanding of the field of industrial engineering; and
Have a good understanding of basic engineering ethics.

Learning Resources:

Course Website: The primary course website will be Brightspace. All course announcements and assignments will be made through the site, so students are strongly recommended to check Brightspace daily for updates.

Textbook: There is no textbook required for this course.

Additional Readings: Links or PDFs for any additional readings for the course will be provided when applicable.

Classroom Expectations: Attendance

Attendance is a required part of the class and students who arrive more than 15 minutes late may not earn their attendance points for that class. Unless otherwise noted, all class sessions will occur in person. Classes are not recorded (if you have DRC accommodations, please contact the primary instructor to discuss options). Any changes to class will be communicated via Brightspace and/or Purdue email. Each class session will have an associated QR code displayed during class which must be scanned to establish attendance. **Sharing or scanning the attendance QR code for anyone other than yourself is considered academic dishonesty and could result in failing the course.**

If there is a need to conduct a class session remotely (for instance, the guest speaker being unable to travel), we will conduct a synchronous Zoom session and attendance will be recorded during the session. As needed, an alternative form of recording attendance will be determined, depending on circumstances, and communicated appropriately by the instructional staff.

If a synchronous Zoom session is needed, all students are expected to mute themselves upon entry (if not already muted), have their cameras on (unless otherwise approved by the instructor), and remain muted until Q&A periods. In the event of a virtual session, students who attempt to join more than 15 minutes after the start of class will not be allowed to join and counted as absent.

It is unacceptable to arrive late or leave prior to the end of class without approval. Technically, you have nowhere else to be during the scheduled class period, and you should not

be making alternative plans for that time. Any student caught leaving early without permission to do so will lose attendance points for that session. That said, if you believe you have an extenuating circumstance (or life just happens), please contact the instructional staff to discuss your situation (see Absence Policy section for additional details).

Classroom Expectations: Participation

This course has significant opportunities for participation, and it is expected that students do so; however, participation is at the discretion of the student. The course will have multiple alumni and corporate speakers who are joining class to either share their perspective on the discipline, and/or as a recruiting opportunity for their companies. This is a fantastic chance to build your professional network or otherwise gather knowledge about being industrial engineering, so take advantage of the opportunity!

Classroom Expectations: Professionalism

Students are expected to be courteous and professional during class. **Students should not be using laptops, cell phones, or otherwise exhibiting disrespectful or disruptive behavior (e.g., doing your math homework or chatting with friends).** Class speakers are giving their time to you. Please be respectful. This is your chance to make a good first impression. If you feel you need the time to work on homework, you can use a personal day.

If you would like to take notes on a laptop, please communicate this to the instructional staff. Otherwise, there is no need to have a laptop out during class. Students who fail to act in a courteous manner will lose attendance points.

Email Communications Expectations:

Always use your Purdue email address to communicate with the instructional staff. Please include “IE 20000 - ” in the subject line.

Grading: How to Pass

The grade for this course is either Satisfactory (“S”; pass) or Unsatisfactory (“U”; fail). Although this is a zero (0) credit course, students must pass it to graduate with a degree in Industrial Engineering. **The grade is made up of four (4) components: guest speaker/lecture attendance, mentor pre-work assignments, mentor discussion attendance, and individual assignments.**

Students must earn a **minimum of 100 points** to earn a Satisfactory (“S”; pass) grade. Any number of points below 100 will earn an Unsatisfactory (“U”; fail) grade. As noted, a passing grade is required to earn a BSIE degree, so students who earn a “U” will have to repeat the course.

There is no partial credit—students will either earn all or none of the points available for each component.

Component	***Points per Item***	***Required Items***	***Max Points***
Guest Speaker/Lecture Attendance	*4 points*	*10*	*40 points*
Mentor Pre-Work Assignments	*5 points*	*3*	*15 points*
Mentor Discussion Attendance	*5 points*	*3*	*15 points*
Individual Assignments	*7.5 points*	*4 (of 5 total)**	*30 points*
TOTAL			***100 points***

**only 4 of the 5 individual assignments will be counted*

Guest Speaker/Lecture Attendance: There are twelve (12) guest speakers/lectures during the semester (schedule below). **Students are required to attend at least ten (10)** of these lectures to pass the course. To earn attendance points, students must scan a QR code during class and respond to a question about the speaker/lecture. Question responses should demonstrate students were paying attention during class. Students should only respond for themselves. Sending or filling out an attendance QR code for another student is considered academic dishonesty and will result in failing the course.

Mentor Discussion Pre-Work Assignments (MPW): There are three (3) assignments students must complete prior to the three (3) mentor discussions. **These assignments are due in Brightspace by 11:59pm the night *before* the discussion date.** This allows your mentor time to review your pre-work and provide better feedback during discussion. Late submissions are not accepted except when approved by the primary instructor. Failure to submit any of the three (3) pre-work assignments will result in a "U" (failing grade) for the course.

Mentor Discussion Attendance (MD): There will be three (3) mandatory in-class mentor discussions. **Students must attend and participate in the mentor discussion to earn their attendance point for the day.** These are held in different locations each time, so please check Brightspace to make sure you go to the right location.
Personal days (unexcused absences) cannot be used for mentor discussions. However, if you are unable to attend class on a mentor discussion day, you can make up that attendance by meeting with your mentor **within one week of the original discussion date**. Failure to earn credit for any of the three (3) mentor discussions will result in a "U" (failing grade) for the course.

Individual Assignments (IA): Students must complete four (4) of five (5) individual assignments for the course. The prompts for each assignment will be shared in Brightspace, but brief descriptions can be found below. The lowest grade will be dropped

from the final grade. Submitting fewer than four (4) individual assignments will result in a "U" (failing grade) for the course.

Assignment	Description	Details	Due Date
Assignment #1	My Avatar	Create an avatar that depicts yourself using an AI tool of your choosing.	5-Sep
Assignment #2	Letter to Your Future Self	Write a letter to your future self.	19-Sep
Assignment #3	User Manual for Me	Create a "User Manual for Me" (https://cassierobinson.medium.com/a-user-manual-for-me-d3a851fbc694).	3-Oct
Assignment #4	Code of Ethics Review	Read the Code of Ethics from two professional organizations, consider their implications, and create your own.	31-Oct
Assignment #5	What is an IE?	Answer questions describing an industrial engineer from your perspective.	21-Nov

**only 4 of the 5 individual assignments will be counted*

Grading: Late Assignment Policy

Students must complete and submit course assignments (MPW and IA) to Brightspace by their respective deadlines to earn credit (do not email assignments to the instructional staff unless instructed to do so). Students are allowed **one (1) late assignment submission (mentor or individual) for the semester**. Once this threshold has been met, any assignments not submitted by the deadline will not be accepted except in the case of extenuating circumstances as determined by the primary instructor. Late assignments must be submitted **within one week of the original due date** to be accepted unless otherwise approved by the primary instructor.

Grading: Submission Guidelines

Course assignments should be submitted as a single PDF with the student's full name and the assignment title so the grader can clearly determine which assignment is being completed. Think of this as generating a report for your employer or a client: do not assume the reader knows what you are responding to or the context.

All course assignments are available in Brightspace well before their due dates, so students are encouraged to plan and work ahead to minimize the risk of missing one (we know semesters can get busy).

Absence Policy & Personal Leave

Similar to professional settings, students in this course are allocated personal leave days. Each student is granted **two (2) personal days (unexcused absences)** to be used at their discretion for guest speaker sessions and instructional staff lectures during the semester. Personal days are ideal for use in the event you have travel, an interview, are mildly ill, or just need a mental health day. We recommend you use these days strategically.

Please note that personal days cannot be applied to mentor discussion days, which are mandatory (see the mentor discussion section for additional details), nor can they be used for assignment submissions.

To earn an additional personal day, email the Primary Instructor with a brief explanation detailing why you chose/plan to pursue industrial engineering as your major before the end of class on Week 3 (9/11).

As with a job, students are also allowed **sick leave** (excused absences). These absences are for more severe circumstances, such as those identified by the Dean of Students. If you are significantly ill, a doctor's note or other documentation will be required to be excused by the primary instructor. Students do not have a designated number of sick leave absences. If you have questions as to whether an absence could be excused, email the primary instructor for clarification. Lectures are not recorded, so making up attendance after the fact is rarely possible.

AI Policy

AI tools may be used to assist with course-related tasks, such as understanding complex concepts, researching topics, or generating ideas for assignments. However, **all work submitted for assessment must be your own original thought, analysis, and effort. If AI tools are used, which tools were used and in what capacities must be disclosed in a statement in the assignment document submitted**. AI can be a tool for support, but it should not be used to complete assignments or produce work that you claim as your own. The majority of assignments are looking for your own perspective or understanding about a topic, so there are no "right" or "wrong" answers. Just completion or incompletion.

If a grader suspects that AI may have been used, they will submit your assignment into an AI-detector. If the percentage is above 70%, and the assignment does not include an AI statement, the assignment will not be accepted. Be careful in using AI for checking grammar as this will often alter the original text too much. There are grammar-checking tools embedded into Word, which would be sufficient for the grammar requirements for this course.

Academic Honesty:
Academic integrity is one of the highest values that Purdue University holds. If a student is found

guilty of academic dishonest as outlined in this syllabus, they will fail the course.

Individuals are encouraged to alert university officials to potential breaches of this value by either emailing or by calling 765-494-8778. While information may be submitted anonymously, the more information that is submitted provides the greatest opportunity for the university to investigate the concern. More recently, students initiated the Honor Pledge: "As a boilermaker pursuing academic excellence, I pledge to be honest and true in all that I do. Accountable together - we are Purdue." If you need a refresher on academic dishonesty, please refer to the *student guide for academic integrity*.

If you are caught engaging in academic dishonesty you will receive a failing grade for the course and a report will be filed with the Office of the Dean of Students.

Course Schedule:

Week	Date	Session Details	Assignments Due
1	28-Aug	Course Intro & Meet Your Mentor	
2	4-Sep	**Mentor Discussion #1 (see announcement for location)**	**MPW #1 Due by 11:59pm on 9/3** IA #1 due 9/12
3	11-Sep	Dr. Young-Jun Son Edwardson School of Industrial Engineering Department Head	
4	18-Sep	P&G	IA #2 due 9/19
5	25-Sep	Richard Penington Healthcare Innovation Executive and Entrepreneur	
6	2-Oct	TBD--Jay Fredericks Owner and Executive Consultant, Antero Advisors LLC	IA #3 due 10/3
7	9-Oct	Steph Bonk Co-Founder & President, Overland AI	
Fall Break			
8	16-Oct	**Mentor Discussion #2 (see announcement for location)**	**MPW #2 Due by 11:59pm on 10/15**

9	23-Oct	Philippe Garnier CEO, Garnier & Garnier Real Estate Developers	
10	30-Oct	*Senior Panel*	IA #4 due 10/31
11	6-Nov	Todd Hockemeyer CEO, Isotpopia	
12	13-Nov	Deep Mehta Sr. Global Sourcing & Supply Manager, Apple	
13	20-Nov	Craig Hartman Sr. Managing Director, GenAI-enabled Value and GTM Strategy @ ServiceNow	IA #5 due 11/21
Thanksgiving Break			
15	4-Dec	**Mentor Discussion #3 (see announcement for location)**	**MPW #3 Due by 11:59pm on 12/3**
16	11-Dec	Course Debrief	

Students with Disabilities:
Purdue University strives to make learning experiences as accessible as possible. If you anticipate or experience physical or academic barriers based on disability, you are welcome to let us know so that we can discuss options. You are also encouraged to contact the Disability Resource Center at: drc@purdue.edu or by phone: 765-494-1247.

Nondiscrimination Statement:
Purdue University is committed to maintaining a community which recognizes and values the inherent worth and dignity of every person; fosters tolerance, sensitivity, understanding, and mutual respect among its members; and encourages each individual to strive to reach his or her own potential. In pursuit of its goal of academic excellence, the University seeks to develop and nurture diversity. The University believes that diversity among its many members strengthens the institution, stimulates creativity, promotes the exchange of ideas, and enriches campus life. Purdue's nondiscrimination policy can be found at http://www.purdue.edu/purdue/ea_eou_statement.html.

Mental Health Information:
Purdue University is committed to advancing the mental health and well-being of its students. If you or someone you know is feeling overwhelmed, depressed, and/or in need of support, services are available. For help, such individuals should contact Counseling and Psychological Services (CAPS) at (765)494-6995 and http://www.purdue.edu/caps/ during and after hours, on weekends and holidays, or through its counselors physically located in the Purdue University Student Health Center (PUSH) during business hours.

If you find yourself beginning to feel some stress, anxiety, and/or feeling slightly overwhelmed, try WellTrack, https://purdue.welltrack.com/. Sign in and find information and tools at your fingertips, available to you at any time.

If you need support and information about options and resources, please see the Office of the Dean of Students, http://www.purdue.edu/odos, for drop-in hours (M-F, 8 am-5 pm).

Mental Health Statement:

- *If you find yourself beginning to feel some stress, anxiety and/or feeling slightly overwhelmed*, try WellTrack**.** Sign in and find information and tools at your fingertips, available to you at any time.
- *If you need support and information about options and resources*, please see the Office of the Dean of Students for drop-in hours (M-F, 8 am- 5 pm).
- *If you're struggling and need mental health services: Purdue University is committed to advancing the mental health and well-being of its students*. If you or someone you know is feeling overwhelmed, depressed, and/or in need of mental health support, services are available. For help, such individuals should contact Counseling and Psychological Services (CAPS) at 765-494-6995 during and after hours, on weekends and holidays, or by going to the CAPS office of the second floor of the Purdue University Student Health Center (PUSH) during business hours.

Emergency Preparedness:

Purdue University is a very safe campus and there is a low probability that a serious incident will occur here at Purdue. However, just as we receive a "safety briefing" each time we get on an aircraft, we want to emphasize our emergency procedures for evacuation and shelter in place incidents. Our preparedness will be critical IF an unexpected event occurs.

Emergency preparedness is your personal responsibility. Purdue University is actively preparing for natural disasters or human-caused incidents with the ultimate goal of maintaining a safe and secure campus. Let's review the following procedures:

- For any emergency call 911.
- There are nearly 300 Emergency Telephone Systems throughout campus that connect directly to the Purdue Police Department (PUPD). If you feel threatened or need help, push the button and you will be connected to the PUPD.
- If we hear a fire alarm we will immediately evacuate the building and proceed to *the parking lot area away from the building.*
    - **Do not use the elevator.**
    - Go over the evacuation route…see specific Building Emergency Plan.
- If we are notified of a Shelter in Place requirement for a tornado warning we will shelter in the lowest level of this building away from windows and doors.
    - Use your cellphone to stay informed.
- If we are notified of a Shelter in Place requirement for a hazardous materials release we will shelter in our classroom shutting any open doors and windows.
- If we are notified of a Shelter in Place requirement for an active threat such as a shooting

we will shelter in a room that is securable preferably without windows. Our preferred location is *to remain in the classroom.*

- We will do what we can to barricade the doors, turn out the lights, and spread out. If necessary, crouch down among the seats and to make the room appear unoccupied.

In the event of a major campus emergency, course requirements, deadlines and grading percentages are subject to changes to accommodate a revised academic calendar. Information about changes in this course will be posted on Brightspace.

EMERGENCY PREPAREDNESS SYLLABUS ATTACHMENT

EMERGENCY NOTIFICATION PROCEDURES are based on a simple concept – if you hear a fire alarm inside, proceed outside. If you hear a siren outside, proceed inside.

- **Indoor Fire Alarms** mean to stop class or research and immediately **evacuate** the building.
  - Proceed to your Emergency Assembly Area away from building doors. **Remain outside** until police, fire, or other emergency response personnel provide additional guidance or tell you it is safe to leave.
- **All Hazards Outdoor Emergency Warning Sirens** mean to immediately seek shelter (**Shelter in Place**) in a safe location within the closest building.
  - "Shelter in place" means seeking immediate shelter inside a building or University residence. This course of action may need to be taken during a tornado, an active threat including a shooting or release of hazardous materials in the outside air. Once safely inside, find out more details about the emergency*. **Remain in place** until police, fire, or other emergency response personnel provide additional guidance or tell you it is safe to leave.

**In both cases, you should seek additional clarifying information by all means possible…Purdue Emergency Status page, text message, Twitter, Desktop Alert, Albertus Beacon, digital signs, email alert, TV, radio, etc.…review the Purdue Emergency Warning Notification System multi-communication layers at http://www.purdue.edu/ehps/emergency_preparedness/warning-system.html*

EMERGENCY RESPONSE PROCEDURES:

- Review the **Emergency Procedures Guidelines** https://www.purdue.edu/emergency_preparedness/flipchart/index.html
- Review the **Building Emergency Plan** (available on the Emergency Preparedness website or from the building deputy) for:
  - evacuation routes, exit points, and emergency assembly area
  - when and how to evacuate the building.
  - shelter in place procedures and locations
  - additional building specific procedures and requirements.

EMERGENCY PREPAREDNESS AWARENESS VIDEOS

- **"Run. Hide. Fight.®"** is a 6-minute active shooter awareness video that illustrates what to look for and how to prepare and react to this type of incident. See: https://www.youtube.com/watch?v=5mzI_5aj4Vs (Link is also located on the EP website)

MORE INFORMATION

Reference the Emergency Preparedness web site for additional information: https://www.purdue.edu/ehps/emergency_preparedness/

Semester Schedule:

Week	Date	Session Details	Assignments Due
1	28-Aug	Course Intro & Meet Your Mentor	
2	4-Sep	**Mentor Discussion #1 (see announcement for location)**	**MPW #1 Due by 11:59pm on 9/3** IA #1 due 9/5
3	11-Sep	Dr. Young-Jun Son Edwardson School of Industrial Engineering Department Head	*Absence Replacement opportunity on 9/11*
4	18-Sep	P&G	IA #2 due 9/19
5	25-Sep	Richard Penington Healthcare Innovation Executive and Entrepreneur	
6	2-Oct	TBD--Jay Fredericks Owner and Executive Consultant, Antero Advisors LLC	IA #3 due 10/3
7	9-Oct	TBD--Steph Bonk Co-Founder & President, Overland AI	
Fall Break			
8	16-Oct	**Mentor Discussion #2 (see announcement for location)**	**MPW #2 Due by 11:59pm on 10/15**
9	23-Oct	Philippe Garnier CEO, Garnier & Garnier Real Estate Developers	*Absence Replacement Opportunity on 10/24*
10	30-Oct	*TBD—Senior Panel*	IA #4 due 10/31
11	6-Nov	Todd Hockemeyer CEO, Isotpopia (pharmaceutical and API manufacturing)	
12	13-Nov	Deep Mehta Sr. Global Sourcing & Supply Manager, Apple	

13	20-Nov	Craig Hartman Sr. Managing Director, GenAI-enabled Value and GTM Strategy @ ServiceNow	IA #5 due 12/1
Thanksgiving Break			
15	4-Dec	**Mentor Discussion #3 (see announcement for location)**	**MPW #3 Due by 11:59pm on 12/3**
16	11-Dec	Course Debrief
