Course Information

CHM 26100, Organic Chemistry, Fall 2025, 1:30 pm MWF, 3 credit hours
FRNY G140

On-line asynchronous: class sessions posted on Brightspace;
navigate to Course Tools -> Kaltura Media Gallery

Instructor Contact Information

Professor David H. Thompson
Room: Bindley Bioscience Center, Rm 294
Phone: 765-494-0386
Email: davethom@purdue.edu (place CHM 26100 in the subject line of all emails!)
Office Hours: BRWN 4103A on W, 12:00 – 1:00 pm; or by appointment

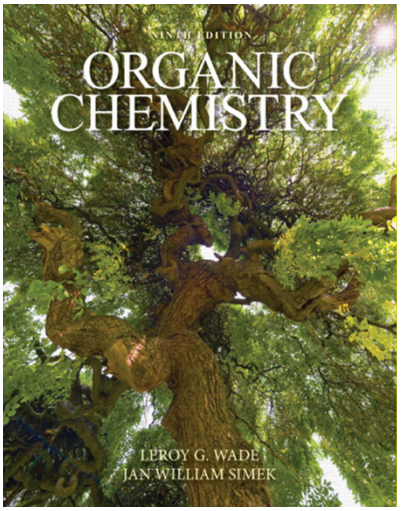

Course TA: Tyler Hicks
Room:
Phone:
Email: hicks208@purdue.edu
Office Hours: M @ 7:00 – 9:00pm via Zoom; or by appointment

Course TA: Zhichen Ma
Room:
Phone:
Email: ma778@purdue.edu
Office Hours: Chemistry Resource Room WTHR 116C**,** F @ 2:30 – 4:30pm; or by appointment

Course Description

CHM 26100 is the first semester of a comprehensive, two-semester initial exploration of organic compounds, their chemistry and mechanisms of transformation, stereochemical principles, structure-property relationships, target-oriented synthesis, and structure elucidation using different analytical techniques. This course focuses on the study of the chemical principles underlying organic chemistry of aliphatic, halogenated, unsaturated and hydroxylated alkyl compounds. Modern theory and stereochemistry are stressed to illustrate the logic inherent in the subject matter and to demonstrate the predictability of many chemical transformations and their relevance to chemical engineering, biomanufacturing, and materials science.

Learning Resources, Technology & Texts

- Brightspace page
  - You can access the course via Brightspace. It is strongly suggested that you explore and become familiar not only with the site navigation, but with content and resources available for this course. All course announcements and adaptations to potential course disruptions will be found here.

- Textbook: L.G. Wade and J.W. Simek, Organic Chemistry, 9th Edition; available in hardcopy, loose-leaf (3-hole punched) or e-Text formats
  - Reading assignments, suggested practice problems, and exam questions will be based on this text.
  - We will cover approximately one chapter in Wade & Simek each week.

- Other organic chemistry texts:
  - Michigan State Virtual Textbook of Organic Chemistry: https://www2.chemistry.msu.edu/faculty/reusch/VirtTxtJml/intro1.htm
  - https://chem.libretexts.org/Bookshelves/Organic_Chemistry/Map%3A_Organic_Chemistry_(Wade)
  - Truncate the "Map%3A_Organic_Chemistry_(Wade)" suffix of the above URL to locate other online book sources that may be helpful.

- Other resources:
  - Many helpful organic chemistry lectures can be found at Khan Academy:
  - https://www.khanacademy.org/science/organic-chemistry
  - https://www.masterorganicchemistry.com

- Tutoring support
  - If you are struggling, reach out to Professor Thompson or the Course TAs for help during office hours or by appointment. The Chemistry Resource Room is also an excellent resource for additional help. If you feel you need more resources, you can request tutor contact information from Prof. Thompson.

- Model Kits: Organic molecules often have complicated 3-dimensional structures that you need to be able to visualize and understand. This course will try to teach you how to interpret 2-D drawings into 3-D space and vice-versa, but it is often made easier if you have a 3-D model to examine and consider. It is strongly recommended that you use a chemistry model kit to help you analyze molecular structures. You will be allowed to use your model kits in any of the exams in CHM 26100.

- ChemDraw: Purdue has a site license for ChemDraw, a simple drawing program for drawing molecular structures. You are strongly encouraged to use it for completing homework assignments.
  - https://guides.lib.purdue.edu/chemlibrary/software

Learning Outcomes

- Learn to apply fundamental bonding, acid-base, kinetic, and thermodynamic principles to organic reactions
- Learn to recognize recurring themes and patterns of reactivity in organic compounds through their shared reaction mechanisms
- Recognize different classes of molecules, their expected physical properties and develop an understanding of organic structure-property relationships

- Use spectrometric and spectroscopic techniques to determine the structures of organic molecules
- Apply an understanding of reaction mechanisms to new transformations of organic molecules
- Acquire the ability to distinguish relationships between organic reactions that initially seem different upon casual consideration
- Learn to plan multistep syntheses of organic molecules
- Recognize the role that organic chemistry plays as an enabling science in pharmaceutical, agricultural, polymer materials and other molecularly-based industries

One of the most effective ways to learn organic chemistry and prepare for assessments is by solving the homework problems as soon as possible after reading the relevant text in Wade and its coverage in lecture to improve your comprehension and familiarity with the material. Additional exercises in the text are suggested below to help strengthen your understanding.

This course moves quickly and the >670 pages of detailed content builds cumulatively over the course of the semester. If you are struggling in the course, you are strongly encouraged to act quickly and make an appointment to work with Prof. Thompson, Mr. Hicks, Mr. Ma, the Chemistry Resource Room staff, or a personal tutor before you fall too far behind. ***Developing the self-discipline to rigorously study the course materials at least two hours each day is your best assurance of success in this course!!!*** Most students who have difficulty with CHM 26100 do so because they lost focus in their studies for some period, not because the material was "too hard". Once they lost that momentum, they found it difficult to catch back up with the class due to its rigorous pace. **Read and work organic chemistry problems every day!**

Assignments

Your learning will be assessed through a combination of thirteen weekly homework sets, three open response assessments, and a comprehensive final assessment that are assigned according to the schedule of due dates appearing below. Details on the homework assignments, cribs, and points accumulated to date will be posted on the course Brightspace.

- **Homework Assignments (25 points each).** Thirteen homework assignments will be given along with a deadline for uploading your responses to Brightspace. ***No late homework assignments will be accepted – a zero will be recorded for that homework score if the deadline is missed!*** The highest 10 scores on these assignments will be counted toward your point total for the course.

- **Hourly Assessments (175 points each).** There will be three evening assessments, comprised of open response questions to evaluate your understanding of the course materials to date. ***No make-up assessments will be possible – if one is missed, that will serve as the exam score that will be dropped from your total accumulated points!***

- **Final Assessment (350 points).** A comprehensive assessment will be administered during Finals Week.

- **The lowest hourly assessment score, *OR* one-half of the final assessment score, will be dropped from your total points accumulated before assigning your letter grade (≤ -175 points).** For example, if you earned 175 points on each hourly assessment and 280 points on the final assessment, then 140 points (i.e., one-half of the final assessment score) would be deducted from your point total. Similarly, if you earned 128 points on the first hourly assessment and perfect scores on all the other assessments, then 128 points would be deducted from your point total before determining the letter grade assignment.

Assignment Schedule	Due Date & Time	Points Available
Homework 1	Sept 1 @ 11:59 pm EDT	25
Homework 2	Sept 8 @ 11:59 pm EDT	25
Homework 3	Sept 15 @ 11:59 pm EDT	25
Assessment 1, Chap 1-5	Thursday, Sept 18 @ 8:00 – 9:00pm EDT	175
Homework 4	Sept 22 @ 11:59 pm EDT	25
Homework 5	Sept 29 @ 11:59 pm EDT	25
Homework 6	Oct 6 @ 11:59 pm EDT	25
Homework 7	Oct 13 @ 11:59 pm EDT	25
Homework 8	Oct 20 @ 11:59 pm EDT	25
Assessment 2, Chap 6-10	Tuesday, Oct 21 @ 8:00 – 9:00pm EDT	175
Homework 9	Oct 27 @ 11:59 pm EDT	25
Homework 10	Nov 3 @ 11:59 pm EST	25
Homework 11	Nov 10 @ 11:59 pm EST	25
Assessment 3, Chap 11-13	Monday, Nov 17 @ 8:00 – 9:00pm EST	175
Homework 12	Nov 24 @ 11:59 pm EST	25
Homework 13	Dec 5 @ 11:59 pm EST	25
Comprehensive Final	TBD	350

Total Points Possible

1. Homework (10 x 25 pts)	250 pts
2. Assessments (3 x 175 pts)	525 pts
3. Comprehensive Final Assessment	350 pts
4. Drop Lowest Assessment Score (Assessments 1, 2, 3 or ½ Final)	-175 pts
Total 1 - 4	***950 pts***

Re-Grading Procedure

The following method **MUST** be followed for all regrades.

Step 1. ***Put in writing the question(s) you would like to have reconsidered and your rationale for why they should be regraded.***

Step 2. ***Staple this written request to your graded assessment and give it to Prof. Thompson.***

Step 3. ***Steps 1 & 2 must be performed within 2 weeks of the assessment date to be eligible for a regrade.*** For Assessment 1, that deadline is Oct. 2. For Assessment 2, the deadline is Nov. 4. For Assessment 3, the deadline is Dec. 1.

Step 4. ***The entire assessment will be re-graded and the points adjusted up or down as appropriate.*** The new score will be entered into the grade book.

Cheating

As a Boilermaker, your colleagues and I will expect you to live true to the Purdue Honors Pledge: *"As a Boilermaker pursuing academic excellence, I pledge to be honest and true in all that I do. Accountable together – we are Purdue."* Students are required to do their own work on homework assignments and assessments. You may find it helpful to study together while preparing solutions to homework problems, however, you must not copy other's answers or use online homework solution resources – the answers must be written on your own without looking at someone else's paper, otherwise it will be treated as cheating. Anyone found cheating, for the first instance, will be given a zero and will NOT be allowed to drop the score. A second violation will result in immediate failure of the course.

Grading Scale

In keeping with University Senate regulations, all students will receive graded feedback in this course between the beginning of Week 5 and the end of Week 7. These grades ***will not*** become part of the permanent record; they are intended to provide guidance on your standing in the course at that time.

Guaranteed Grade Cut-offs (out of a total of 950 pts)

A	≥ 870
B	869 – 740
C	739 – 600
D	599 – 460
F	0 – 459

Academic Guidance in the Event a Student is Quarantined/Isolated

If you become quarantined or isolated at any point in time during the semester, in addition to support from the Protect Purdue Health Center, you will also have access to an Academic Case Manager who can provide you academic support during this time. Your Academic Case Manager can be reached at acmq@purdue.edu and will provide you with general guidelines/resources around communicating with your instructors, be available for academic support, and offer suggestions for how to be successful when learning remotely. Importantly, if you find yourself too sick to progress in the course, notify your academic case manager and notify me via email. Arrangements will be made based on your particular situation. The Office of the Dean of Students (odos@purdue.edu) is also available to support you should this situation occur. ***If you have any concerns about your health, contact the Protect Purdue Health Center at 765-496-4636.***

Abbreviated Course Schedule

Schedule/assignment dates may change. Changes will be posted as Brightspace Announcements.

Week	Readings in Wade & Simek	Assignments
Week 1	Chap 1, pg. 1-49; Chap 2, pg. 55-72	
Week 2	Chap 2, pg. 73-98; Chap 3, pg. 107-148	Homework 1 (Sept 1)
Week 3	Chap 4, pg. 155-193	Homework 2 (Sept 8)
Week 4	Chap 5, pg. 201-241	Homework 3 (Sept 15)
Week 5	Chap 6, pg. 247-274	Assessment 1 (Sept 18) Homework 4 (Sept 22)
Week 6	Chap 6, pg. 275-287; Chap 7, pg. 296-318	Homework 5 (Sept 29)
Week 7	Chap 7, pg. 319-349; Chap 8, pg. 359-381	Homework 6 (Oct 6)
Week 8	Chap 8, pg. 382-410	Homework 7 (Oct 13)

Week 9	Chap 9, pg. 428-452; Chap 10, pg. 460-473	Assessment 2 (Oct 21) & Homework 8 (Oct 20)
Week 10	Chap 10, pg. 474-496; Chap 11, pg. 505-523	Homework 9 (Oct 27)
Week 11	Chap 11, pg. 524-546	Homework 10 (Nov 3)
Week 12	Chap 13, pg. 607-636	Homework 11 (Nov 10)
Week 13	Chap 13, pg. 637-652	Assessment 3 (Nov 17)
Week 14	Chap 13, pg. 656-660	Homework 12 (Nov 24)
Week 15	Chap 12, pg. 556-583	Homework 13 (Dec 5)
Week 16	Chap 12, pg. 584-597	

Important Dates on the Academic Calendar

- Aug. 25 – Classes Begin
- Sept. 1 – Labor Day
- Oct. 13 & 14 – October Break
- Nov. 26-30 – Thanksgiving Break
- Dec. 12 – Classes End
- Dec. 15-20 – Final Exams
- Dec. 21 – Commencements

For the full calendar, see: https://catalog.purdue.edu/preview_program.php?catoid=17&poid=31829

Attendance Policy

Excuses for missing an assessment are ONLY those coming from the Dean's office. Missing an assessment for personal reasons, short term illness or injury, field trips, etc. will not be excused (this will serve as your score to be dropped). Consult the Brightspace shell for a link under the University Policies menu to review Attendance and Grief Absence policies.

Students should stay home and contact the Protect Purdue Health Center (496-INFO) if they feel ill. It is the responsibility of the student to inform Prof. Thompson of any conflict that can be anticipated that will affect the submission of a homework assignment or the ability to take an assessment. Only Professor Thompson can excuse a student from a course requirement or responsibility. When conflicts can be anticipated, such as for many University-sponsored activities and religious observations, the student should inform Prof. Thompson of the situation as far in advance as possible. For unanticipated or emergency conflict, when advance notification is not possible, the student should contact Prof. Thompson as soon as possible after the fact by email or by phone. When the student is unable to make direct contact with Prof. Thompson and is unable to leave word with one of the course Teaching Assistants because of circumstances beyond the student's control, and in cases of bereavement, quarantine, or isolation, the student or the student's representative should contact the Office of the Dean of Students via email or phone at 765-494-1747.

Academic Integrity

Academic integrity is one of the highest values that Purdue University holds and is key quality for maintaining the value and respect that is engendered by recipients of a Purdue degree. It is also the basis for the **Purdue Honor Pledge:** ***"As a boilermaker pursuing academic excellence, I pledge to be honest and true in all that I do. Accountable together - we are Purdue."***

In the event that potential breaches of this value are observed, individuals are encouraged to alert university officials by either emailing integrity@purdue.edu or by calling 765-494-8778. Information may be submitted

anonymously; the more information submitted the greater the opportunity for the university to investigate the concern. More details are available on our course Brightspace table of contents, under University Policies.

Note regarding the use of commercial websites:

1. CHM 26100 course policy is that web pages like Course Hero, Quizlet or other online services are not appropriate to use for completing course work items such as homework assignments or assessments.
2. Since Prof. Thompson's notes are copyright protected, they cannot be sold, bartered, or posted without his express written permission.

Nondiscrimination Statement

Purdue University is committed to maintaining a community which recognizes and values the inherent worth and dignity of every person; fosters tolerance, sensitivity, understanding, and mutual respect among its members; and encourages each individual to strive to reach his or her own potential. In pursuit of its goal of academic excellence, the University seeks to develop and nurture diversity. The University believes that diversity among its many members strengthens the institution, stimulates creativity, promotes the exchange of ideas, and enriches campus life. The institution views, evaluates, and treats all persons in any University related activity or circumstance in which they may be involved, solely as individuals on the basis of their own personal abilities, qualifications, and other relevant characteristics.

Purdue University prohibits discrimination against any member of the University community on the basis of race, religion, color, sex, age, national origin or ancestry, genetic information, marital status, parental status, sexual orientation, gender identity and expression, disability, or status as a veteran. The University will conduct its programs, services and activities consistent with applicable federal, state and local laws, regulations and orders and in conformance with the procedures and limitations as set forth in Purdue's Equal Opportunity, Equal Access and Affirmative Action policy which provides specific contractual rights and remedies. Additionally, the University promotes the full realization of equal employment opportunity for women, minorities, persons with disabilities and veterans through its affirmative action program. Any question of interpretation regarding this Nondiscrimination Policy Statement shall be referred to the **Vice President for Ethics and Compliance** for final determination.

Accessibility

We strive to make the CHM 26100 learning experience as accessible as possible. If you anticipate or experience physical or academic barriers based on disability, please contact Prof. Thompson so that we can discuss options. You are also encouraged to contact the Disability Resource Center at: drc@purdue.edu or by phone: 765-494-1247. More details are available on our course Brightspace under Accessibility Information. The University also has assistance available to help you make learning materials accessible, including:

- *Information from Innovative Learning on Universal Design for Learning*
- *Guidance from Innovative Learning on creating accessible documents*
- *Workshops on accessible materials suggested by the DRC*
- *Contact innovativelearningteam@purdue.edu with questions.*

Mental Health Statement

If you find yourself beginning to feel some stress, anxiety and/or feeling slightly overwhelmed, try WellTrack. Sign in and find information and tools at your fingertips, available to you at any time.

If you need support and information about options and resources, please contact or see the Office of the Dean of Students. Call 765-494-1747. Hours of operation are M-F, 8 - 5.

If you find yourself struggling to find a healthy balance between academics, social life, stress, etc. sign up for free one-on-one virtual or in-person sessions with a Purdue Wellness Coach at RecWell. Student coaches can help you navigate through barriers and challenges toward your goals throughout the semester. Sign up is completely free and can be done on BoilerConnect. Questions? → Contact Purdue Wellness at evans240@purdue.edu.

If you're struggling and need mental health services: Purdue University is committed to advancing the mental health and well-being of its students. If you or someone you know is feeling overwhelmed, depressed, and/or in need of mental health support, services are available. For help, such individuals should contact Counseling and Psychological Services (CAPS) at 765-494-6995 during and after hours, on weekends and holidays, or by going to the CAPS office of the second floor of the Purdue University Student Health Center (PUSH) during business hours. A link to CAPS (listed as Purdue Counseling and Psychological Services) is also on the Brightspace template, under the Student Services and Resources section.

Emergency Preparation

In the event of a major campus emergency, course requirements, deadlines and grading percentages are subject to changes that may be necessitated by a revised semester calendar or other circumstances beyond the instructor's control. Relevant changes to this course will be posted onto the course website or can be obtained by contacting Prof. Thompson or the TAs via email or phone. You are expected to read your @purdue.edu email on a frequent basis.

CHM 26100: Tentative Lecture Schedule, Fall 2025

Bold underline dates ⇒ **Homework due date**

Date	Lect	Chap:	Lecture Topic
Aug.25	1	1:	Bonding Types, Octet Rule, Formal Charge, Lewis Structures
27	2	1:	Molecular Shapes, Resonance, Bond Rotation, Isomerism
29	3	2:	Bond Polarity, Intermolecular Forces, Effect of Electronegativity on Acid Strength
Sept. **1**			**LABOR DAY**
3	4	2:	Lewis Acid-Base Theory, Curved Arrow Formalism, Effects of Structure on Acidity
5	5	3:	Nomenclature, Physical Properties & Reactions of Alkanes
8	6	3:	Conformational Analysis of Alkanes & Cycloalkanes, Cis-Trans Isomers
10	7	4:	Free Energy & K_{eq}, Bond Dissociation Energies, Activation Energy
12	8	4:	Temperature Dependence on Reaction Rate, Transition States, Multistep Reactions
15	9	4:	Selectivity in Halogenation, Hammond Postulate, Reactive Intermediates
17	10	5:	Chirality, Symmetry, (*R*) & (*S*) Nomenclature, Optical Activity
18			***Assessment #1, 8-9pm: last names A-M ⇒ RHPH 172, N-Z ⇒ MATH 175***
19			**No Lecture**
22	11	5:	Diastereomers, Meso Compounds, Resolution of Enantiomers
24	12	5:	Chiral Molecules w/o Chiral C, Fischer Projections, Resolution of Enantiomers
26	13	6:	Nomenclature & Physical Properties of Alkyl Halides, Preparation of Alkyl Halides
29	14	6:	Reactions of Alkyl Halides, Substitution and Elimination
Oct. 1	15	6:	Bimolecular Nucleophilic Substitution: S_N2, Factors Affecting S_N2 Reactions
3	16	6:	Unimolecular Nucleophilic Substitution: S_N1, Rearrangements in S_N1 Reactions
6	17	6:	Comparison of S_N1 and S_N2 Reactions
8	18	7:	Nomenclature of Alkenes, Cis-Trans Isomerism, Physical Properties, E_1 Reaction
10			**No Lecture**
13			**OCTOBER BREAK**
15	19	7:	Zaitsev's Rule, E_2 Reaction, Competition Between Substitution & Elimination
17	20	7:	Alkene Synthesis by Alcohol Dehydration, Industrial Synthesis of Alkenes
20	21	8:	Electrophilic Addition to Alkenes: HX, H_2O, and Hydroboration
21			***Assessment #2, 8-9pm: last names A-M ⇒ PHYS 114, N-Z ⇒ HAMP 1144***
22	22	8:	Halogen Addition, Halohydrin Formation, Catalytic Hydrogenation, Carbene Addition
24	23	8:	Epoxidation, Dihydroxylation, and Oxidative Cleavage of Alkenes
27	24	8:	Olefin Metastasis, Polymerization, Synthetic Polymers
29			**No Lecture**
31	25	9:	Nomenclature and Physical Properties of Alkynes, Terminal Alkyne Acidity
Nov. **3**	26	9:	Synthesis of Alkynes, Reactions of Alkynes
5	27	10:	Structure, Nomenclature, Physical Properties, and Acidity of Alcohols
7	28	10:	Synthesis of Alcohols, Organometallic Reagents, Grignard Reaction
10	29	10:	Synthesis of Alcohols by Hydride Reduction, Thiols
12	30	11:	Reactions of Alcohols with Phosphorus Halides, Reactions of Diols, Alkoxides
14	31	12:	Mass Spectrometry—Instrumentation, Ionization, and Isotope Peaks
17	32	12:	Mass Spectrometry— Fragmentation Mechanisms & Structure Elucidation
17			***Assessment #3, 8-9pm: last names A-M ⇒ RHPH 172, N-Z ⇒ MATH 175***
19	33	12:	Mass Spectrometry—Characteristic Absorptions & Spectral Interpretation
21	34	12:	Mass Spectrometry—Structure Elucidation Using MS
24	35	13:	NMR Spectroscopy—Physical Basis, Instrumentation & ^{1}H Chemical Shift
26-30			**THANKSGIVING HOLIDAY**
Dec. 1	36	13:	NMR Spectroscopy—Relationship of Structure to Chemical Shift & Integral
3	37	13:	NMR Spectroscopy—Spin-Spin Splitting, Complex Splitting
5	38	13:	NMR Spectroscopy—^{13}C NMR, Solving Unknown Structures & Dynamic NMR
8	39	13:	NMR Spectroscopy—Structure Elucidation Using MS, ^{1}H NMR & ^{13}C NMR
10	40	13:	NMR Spectroscopy—Structure Elucidation Using MS, ^{1}H NMR & ^{13}C NMR
12	41		Review

CHM 26100 Reading Schedule, Fall 2025

Week	Dates	Sections from Wade & Simek "Organic Chemistry", 9th Edition
1	8/25 – 8/29	Chap 1, pg. 1-49; Chap 2, pg. 55-72
2	9/1 – 9/5	Chap 2, pg. 73-98; Chap 3, pg. 107-148
3	9/8 – 9/12	Chap 4, pg. 155-193
4	9/15 – 9/19	Chap 5, pg. 201-241
5	9/22 – 9/26	Chap 6, pg. 247-274
6	9/29 – 10/3	Chap 6, pg. 275-287; Chap 7, pg. 296-318
7	10/6 – 10/10	Chap 7, pg. 319-349; Chap 8, pg. 359-381
8	10/13 – 10/17	Chap 8, pg. 382-410
9	10/20 – 10/24	Chap 9, pg. 428-452; Chap 10, pg. 460-473
10	10/27 – 10/31	Chap 10, pg. 474-496; Chap 11, pg. 505-523
11	11/3 – 11/7	Chap 11, pg. 524-546
12	11/10 – 11/14	Chap 12, pg. 584-597
13	11/17 – 11/21	Chap 12, pg. 584-597
14	11/24 – 11/28	Chap 13, pg. 607-636
15	12/1 – 12/5	Chap 13, pg. 637-652
16	12/8 – 12/12	Chap 13, pg. 656-660

Suggested Study Problems from Wade & Simek "Organic Chemistry", 9th Edition

Chapter	Problem Numbers
1	26, 29, 31a-h, 33, 39, 41, 45, 53, 57
2	31-34, 37-39, 43, 45, 50, 51, 53, 56
3	33, 34, 36, 39a-c, 42, 44-48, 52
4	34-39, 41, 42, 44-47, 49, 51, 52, 56, 58
5	25-28, 30, 31, 34-37, 39
6	30, 32-37, 41-47, 49, 50, 52-55, 58
7	40-43, 46-52, 55, 57-60, 62-64, 68, 70, 71
8	46, 48, 50, 52, 55-57, 59-61, 63, 64, 67, 69a-e, 70, 72-74, 76
9	26-29, 34, 36, 40, 43
10	30, 31, 33-36, 38, 42, 45-51, 56, 60
11	39, 45, 47, 48, 50, 51, 53, 55, 64
12	Mass spectrometry: 17, 18, 20, 23, 26, 27, 29
13	33-36, 40, 43-45, 47, 48, 49, 52, 55, 56

Assessment Schedule

Week	Dates	Assessment Content
5	9/18	Chapters 1 – 5
9	10/21	Chapters 6 – 8
13	11/17	Chapter 9 – 13
