# CE 34300 – Elementary Hydraulics Laboratory
# Purdue University - Spring 2026

## Course Information

| | |
|---|---|
| **Course:** | CE34300 (Elementary Hydraulics Laboratory) |
| **CRN:** | Various – depends on section (see below) |
| **Meeting time(s):** | 3 hours weekly; meeting time depends on section (see below) |
| **Instructional modality:** | Face to face; hands-on laboratory exercises |
| **Meeting room:** | HAMP B115F (the entrance to the lab is on the *ground* floor, one flight of steps down from the southeastern entrance of HAMP – that on the Stadium Mall side nearest to the Chemical Engineering Building, through the beige door with sign saying 343 and a plaque to the right saying Burke Hydraulic Laboratory) |
| **Course credit hours:** | 1 |
| **Co/pre-requisites:** | Co-requisite: CE34000 (Hydraulics) – not that CE340 is an entirely separate class, although there is content coordination and overlap by design |

## Course Description

**Catalog description** The laboratory covers basic concepts in analysis of experimental data and methods in hydraulic measurements. A variety of simple laboratory experiments illustrating the principles of hydraulics are performed.

## Learning Outcomes

With successful completion of this course the student should be able to:

- Perform simple experiments involving flow and fluid phenomena
- Perform elementary analysis of experimental data, including the verification of empirical correlations
- Communicate technical results in written and graphical form

## Learning Resources, Technology, & Texts

- Required: CE343 Lab Manual, which is posted on the course Brightspace page
- Software: You should have access to a computer with Excel, Word, the internet
- Brightspace: Course materials are provided on a Brightspace course site
- Gradescope: Course assignments will likely be collected and assessed using the Gradescope website/system
- Hardware requirements:
  - PDF scanner (phone is usually fine) for homework problem submission to Gradescope
  - Camera and microphone for your computer or phone may be useful for attending online office hours
- Required: Goggles (some labs) and **closed-toed shoes (all labs)**

## Assignments and grading

Your learning will be assessed through weekly lab assignments unless otherwise noted and two formal lab reports. There will be no final exam. The weighting of these in the evaluation of a final score is as follows:

| Weekly assignments and formal lab reports | Allocated weighting |
|---|---|
| Weekly assignments (~10 – 12) | 65%* |
| Formal lab reports (~2-3) | 35%* total |

*Weighted according to the amount of work and difficulty

## Grading scale

- The course will be graded according to the simple scale, i.e., A, B, C, etc. Grades on individual assignments can differ between sections due to differences in grading. However, at the end of the semester, grades are standardized between sections. Thus, if you have a "hard grader" as your TA, this is accounted for when final grades are determined.
