Civil Engineering

Engineer better communities. From designing skyscrapers and bridges to protecting coastlines, delivering clean water and powering cities with renewable energy, your work shapes the world we live in.

JUMP TO: CAREERS CONNECT TRANSFER

Program Summary

As a civil engineer, you don't just imagine better communities — you create them. In this program, tackle real-world challenges like making infrastructure more resilient, building smart cities and driving environmental sustainability. Whether you're building roads or restoring rivers, you're making life safer, cleaner and better for everyone.

Our program prepares you to tackle future challenges and serve as key stakeholders in improving our society. With nine engineering emphasis areas — architectural, construction, environmental, geomatics, geotechnical, hydraulic and hydrologic, materials, structural and transportation — tailor your education toward your career goals. Enjoy small class sizes, supportive advising and hands-on learning opportunities through study abroad programs, co-ops and internships. Our students also have the option to participate in an integrated bachelor's and master's degree program that can be completed in as little as five years.

APPLYING

Applying to Engineering in West Lafayette

To study civil engineering at Purdue, you will apply to the first-year engineering program. All engineering students in West Lafayette build a foundation for success by completing core first-year engineering curriculum before transitioning to a specialty major in the second year. Core curriculum includes courses in math, chemistry, physics, computer programming and communication skills, as well as introductory engineering coursework that explores career options to help you identify which specialty major is the right fit.

The priority application deadline for first-year engineering is Nov. 1. Applications received after Nov. 1 for this competitive major will be evaluated based on available space.

Possible Careers

Our students gain valuable hands-on experience that prepares them for diverse careers to make life safer, cleaner and better for everyone such as:

- Civil engineer
- Construction project manager
- Environmental engineer
- Structural engineer
- Surveyor
- Sustainability consultant
- Urban planner

George McAtee

Learn how George McAtee's love for playing soccer drives his civil engineering journey — designing community spaces for everyone to enjoy the outdoors.

Transfer to Civil Engineering

Purdue admits to individual majors. Transfer students must meet Purdue's overall transfer criteria, as well as any major-specific requirements. Before you apply, check the closed programs page to confirm this major is open to transfer students. If it is, refer to the information below for major-specific transfer criteria.

- Minimum 3.0 GPA
- For detailed admissions requirements to transfer into any of Purdue's engineering majors, review our engineering transfer criteria.
