Chemical Engineering

Use innovative ideas to transform raw materials into high-value products and processes. As a chemical engineer, you'll harness chemistry and chemical properties to solve real-world problems — fueling cleaner energy, better medicine and smarter manufacturing.

JUMP TO: CAREERS CONNECT TRANSFER

Program Summary

Quick Facts

Apply the principles of chemistry and physics to design equipment and processes for manufacturing products such as fuel, detergents, paper and food. As a chemical engineer, you will apply innovative technology and research to transform laboratory processes into efficient, full-scale operations.

Combine strong problem-solving skills and a solid foundation in math, physics, chemistry and biology with hands-on research experiences to solve complex industrial problems. Our chemical engineer graduates also are among the top earners right out of college with a bachelor's degree.

APPLYING

Applying to engineering in West Lafayette

To study chemical engineering at Purdue, you will apply to the first-year engineering program. All engineering students in West Lafayette build a foundation for success by completing core first-year engineering curriculum before transitioning to a specialty major in the second year. Core curriculum includes courses in math, chemistry, physics, computer programming and communication skills, as well as introductory engineering coursework that explores career options to help you identify which specialty major is the right fit.

The priority application deadline for first-year engineering is Nov. 1. Applications received after Nov. 1 for this competitive major will be evaluated based on available space.

Possible Careers

With a degree in chemical engineering, our students are prepared to succeed in high-impact careers across industries like pharmaceuticals, product development and energy including:

- Chemical engineer
- Bioprocess engineer
- Data analyst and process modeler
- Environmental engineer
- Food process engineer
- Process engineer
- Semiconductor process engineer

Transfer to Chemical Engineering

Purdue admits to individual majors. Transfer students must meet Purdue's overall transfer criteria, as well as any major-specific requirements. Before you apply, check the closed programs page to confirm this major is open to transfer students. If it is, refer to the information below for major-specific transfer criteria.

- Minimum 3.0 GPA
- For detailed admissions requirements to transfer into any of Purdue's engineering majors, review our engineering transfer criteria.
