Industrial Engineering

Design and improve systems that bring people, machines and information together such as supply chains, healthcare and manufacturing. Use math, science and creativity to solve real-world problems and make systems smarter, faster and more efficient.

JUMP TO: CAREERS CONNECT TRANSFER

Program Summary

Industrial engineering is all about making systems work better. Learn to design, analyze and improve systems that involve people, materials, technology and information — like optimizing supply chains, speeding up a factory's production line and streamlining a hospital's patient flow. Using skills in math, science and business, solve real-world problems to boost efficiency, cut costs and keep systems running safely and smoothly. Our

students are prepared to work in just about any industry — from manufacturing and technology to healthcare and government — wherever systems need to work smarter.

APPLYING

Applying to Engineering in Indianapolis

At our Indianapolis location, jumpstart your career with direct admission to your engineering major of choice. From day one, you enroll in industrial engineering and follow a core curriculum similar to that of first-year engineering in West Lafayette.

Industrial engineering in Indianapolis is a **2+2 program**. Complete your first two years in Indianapolis, then transition to Purdue's West Lafayette campus to finish your degree.

Why this path? Starting in Indianapolis, you'll gain direct admission to one of the nation's top-ranked Industrial Engineering programs — and the largest in Indiana. You'll benefit from a smaller, close-knit cohort and an urban campus experience before transitioning to West Lafayette for your final two years. There, you'll continue your studies in cutting-edge labs and expand your professional network.

Applying to Engineering in West Lafayette

To study industrial engineering in West Lafayette, you will apply to the first-year engineering program. All engineering students in West Lafayette build a foundation for success by completing core first-year engineering curriculum before transitioning to a specialty major in the second year. Core curriculum includes courses in math, chemistry, physics, computer programming and communication skills, as well as introductory engineering coursework that explores career options to help you identify which specialty major is the right fit.

The priority application deadline for first-year engineering is Nov. 1. Applications received after Nov. 1 for this competitive major will be evaluated based on available space

Possible Careers

With a degree in industrial engineering, our students enjoy a wide range of careers across industries that focus on improving systems and processes including:

- Healthcare systems engineer
- Industrial engineer
- Logistics coordinator
- Process engineer
- Project manager
- Operations manager
- Supply chain analyst

APPLY NOW

Transfer to Industrial Engineering

Purdue admits to individual majors. Transfer students must meet Purdue's overall transfer criteria, as well as any major-specific requirements. Before you apply, check the closed programs page to confirm this major is open to transfer students. If it is, refer to the information below for major-specific transfer criteria.

- Minimum 3.0 GPA
- For detailed admissions requirements to transfer into any of Purdue's engineering majors, review our engineering transfer criteria.
