Mechanical Engineering

From powering cities to exploring space, mechanical engineers shape the world. At Purdue, dive into 3D printing, robotics, energy and more — turning big ideas into real solutions across every industry.

JUMP TO: CAREERS CONNECT TRANSFER

Program Summary

Mechanical engineering is the broadest of all engineering majors, opening doors to careers in every industry. At Purdue, explore a wide range of topics like physics, electronics, 3D printing, fluid mechanics, heat transfer and controls. Gain hands-on experience by joining a motorsports team, designing rockets, serving the community, conducting graduate-level research or by immersing yourself in global engineering during a study abroad opportunity. As a mechanical engineer, you'll develop creative solutions to global challenges in energy, transportation, health care and more.

APPLYING

Applying to Engineering in Indianapolis

At our Indianapolis location, jumpstart your career with direct admission to your engineering major of choice. From day one, you enroll in mechanical engineering and follow a core curriculum similar to that of first-year engineering in West Lafayette. Your first year in Indianapolis includes courses in math, chemistry, physics, computer programming and communication.

Applying to Engineering in West Lafayette

To study mechanical engineering in West Lafayette, you will apply to the first-year engineering program. All engineering students in West Lafayette build a foundation for success by completing core first-year engineering curriculum before transitioning to a specialty major in the second year. Core curriculum includes courses in math, chemistry, physics, computer programming and communication skills, as well as introductory engineering coursework that explores career options to help you identify which specialty major is the right fit.

The priority application deadline for our engineering majors is Nov. 1. Applications received after Nov. 1 for this competitive major will be evaluated based on available space.

Possible Careers

Our students have become astronauts, athletes, entrepreneurs and everything in between. With a degree in mechanical engineering, you can enjoy a wide range of careers such as:

- Automotive engineer
- Energy engineer
- Mechanical engineer
- Operations manager
- Patent examiner
- Research and development engineer
- Systems engineer

Meet Our Students

William Flaherty

Which is more difficult: slaloming down a ski slope at 50 miles per hour, or designing a rocket to travel 1,000 miles per hour? William Flaherty, a Purdue mechanical engineering student, has done both!

Transfer to Mechanical Engineering

Purdue admits to individual majors. Transfer students must meet Purdue's overall transfer criteria, as well as any major-specific requirements. Before you apply, check the closed programs page to confirm this major is open to transfer students. If it is, refer to the information below for major-specific transfer criteria.

- Minimum 3.0 GPA
- For detailed admissions requirements to transfer into any of Purdue's engineering majors, review our engineering transfer criteria.
